

„/” SLASH LAMP

Design by Dragoş Motica

“/” Lamp comprises materials inspired by the industrial facilities and construction sites: concrete, reinforcing wire, climbing rope & spool for high voltage wires. It is an object that allows easy interaction, adding a subjective and personal twist to the end design.

Using the provided stone, you can experiment with larger or smaller bits and holes. The more you'll expose the reinforcing wire, the more you'll get going from a direct to a reflected light.

GENERAL MAINTENANCE

Use a damp cloth, a soft brush or a sponge to wipe clean the concrete. For the cork part, use a microfiber cloth when dry dusting. Use a light touch and do not rub the cloth forcibly over the surface.

Blue Concrete

White Concrete

Grey Concrete

Red Concrete

Yellow Concrete
