Allen Key 3
Allen Key 2

To adjust the glass door the height must be calibrated. If you need to raise the glass door, you loosen the top hinge and tighten the bottom hinge.

If you need to lower the glass door, you loosen the bottom hinge and tighten the top hinge.

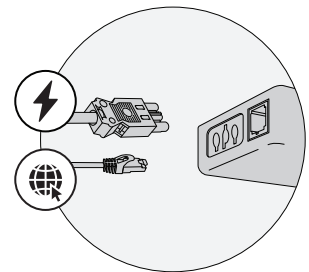

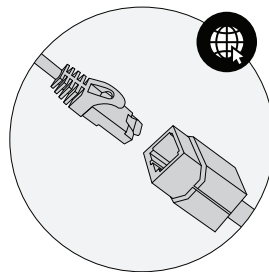

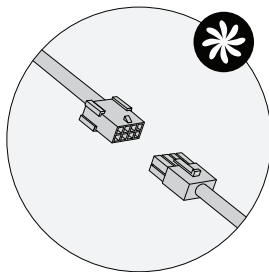

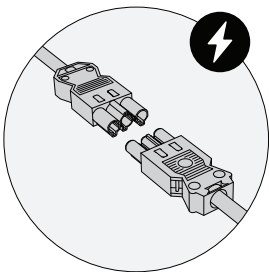

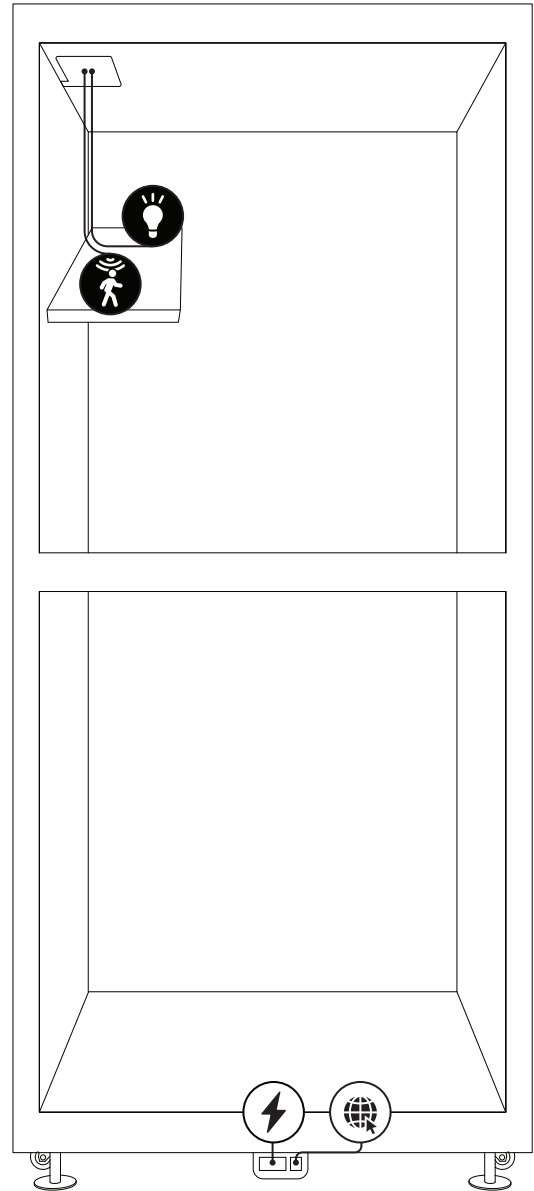

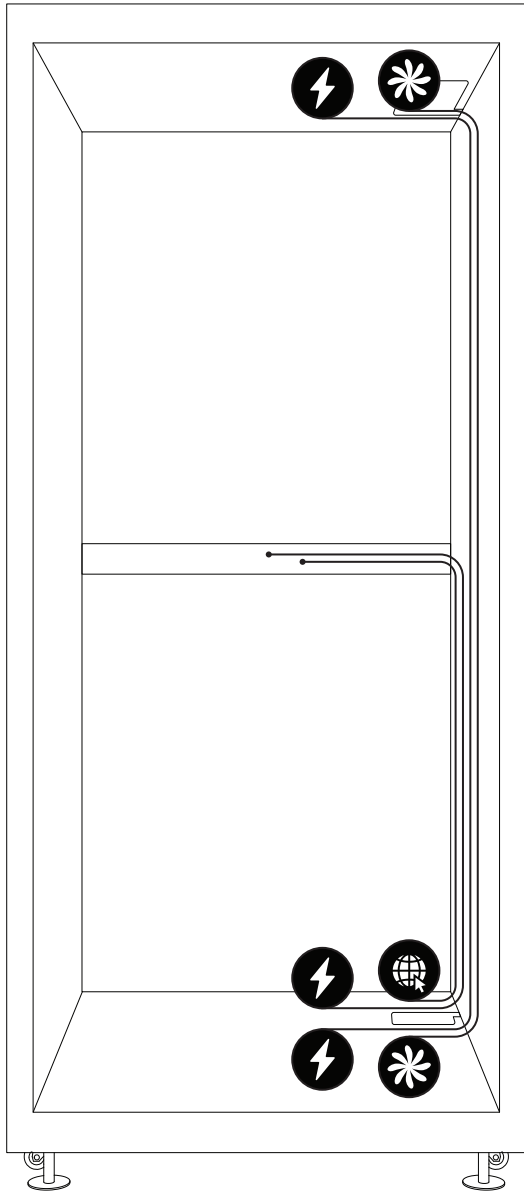

Check if the door closes properly and adjust the door plates if needed.

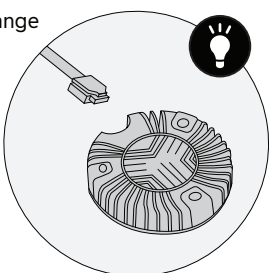

Tighten or loosen the plates when needed.

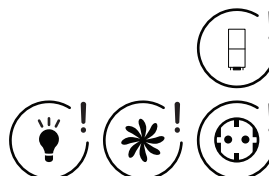

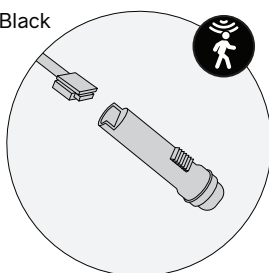

7

Orange

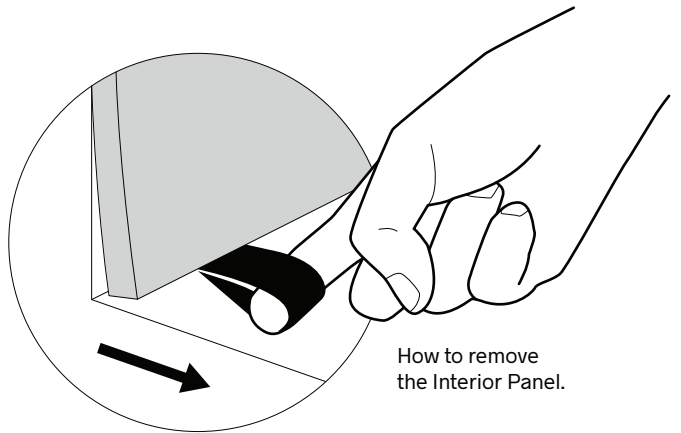

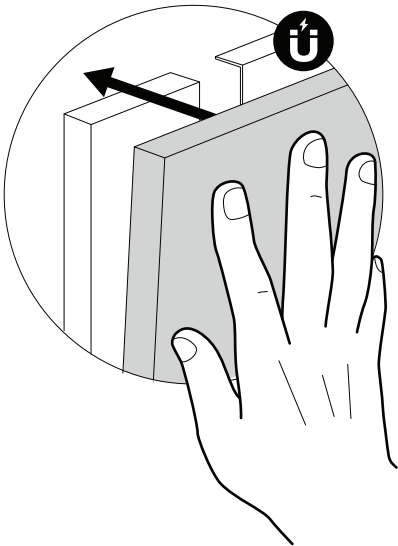

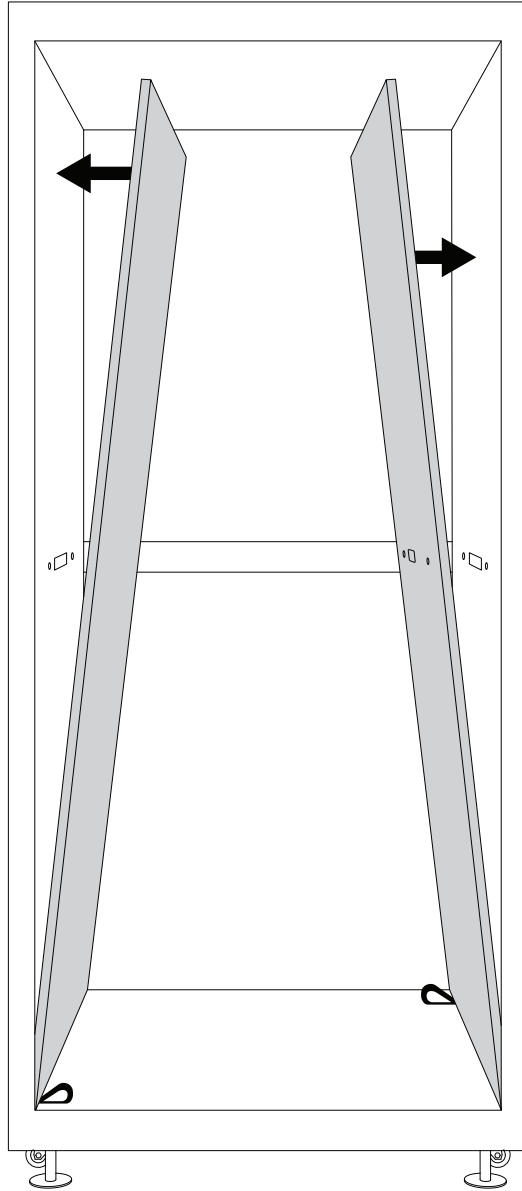

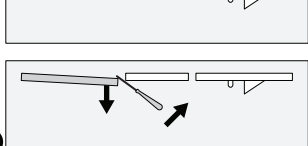

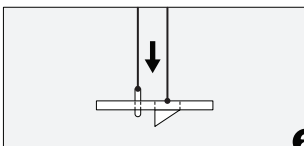

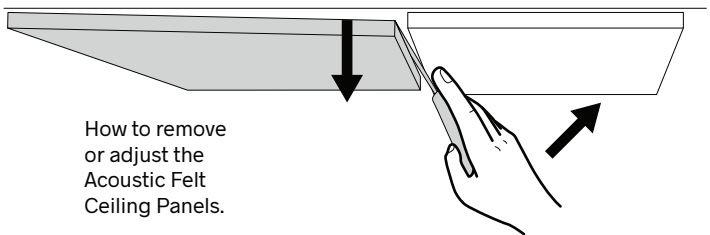

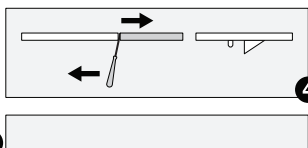

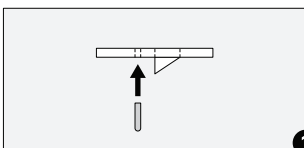

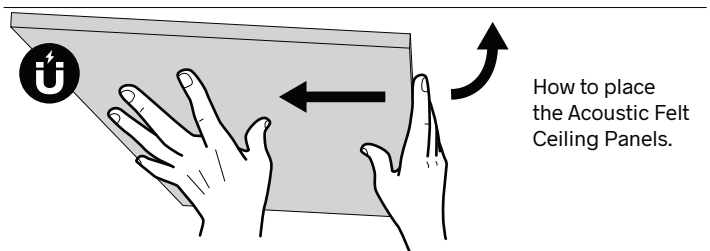

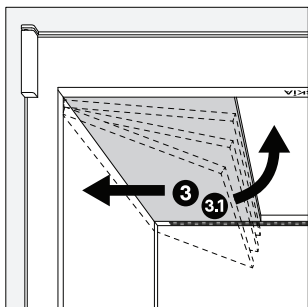

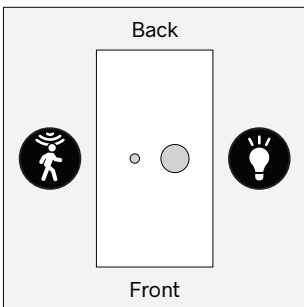

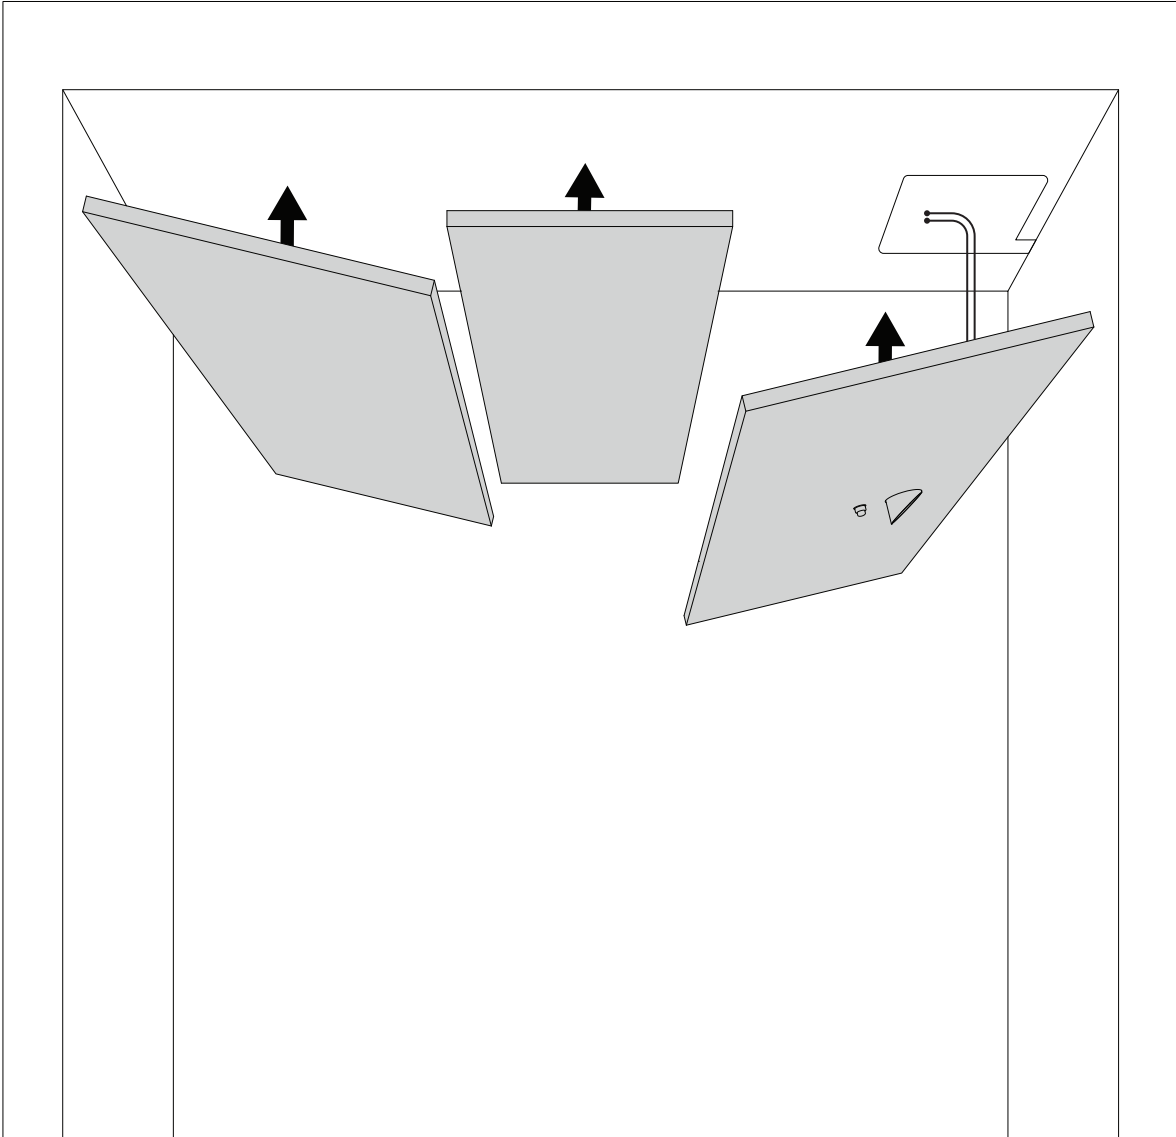

Black

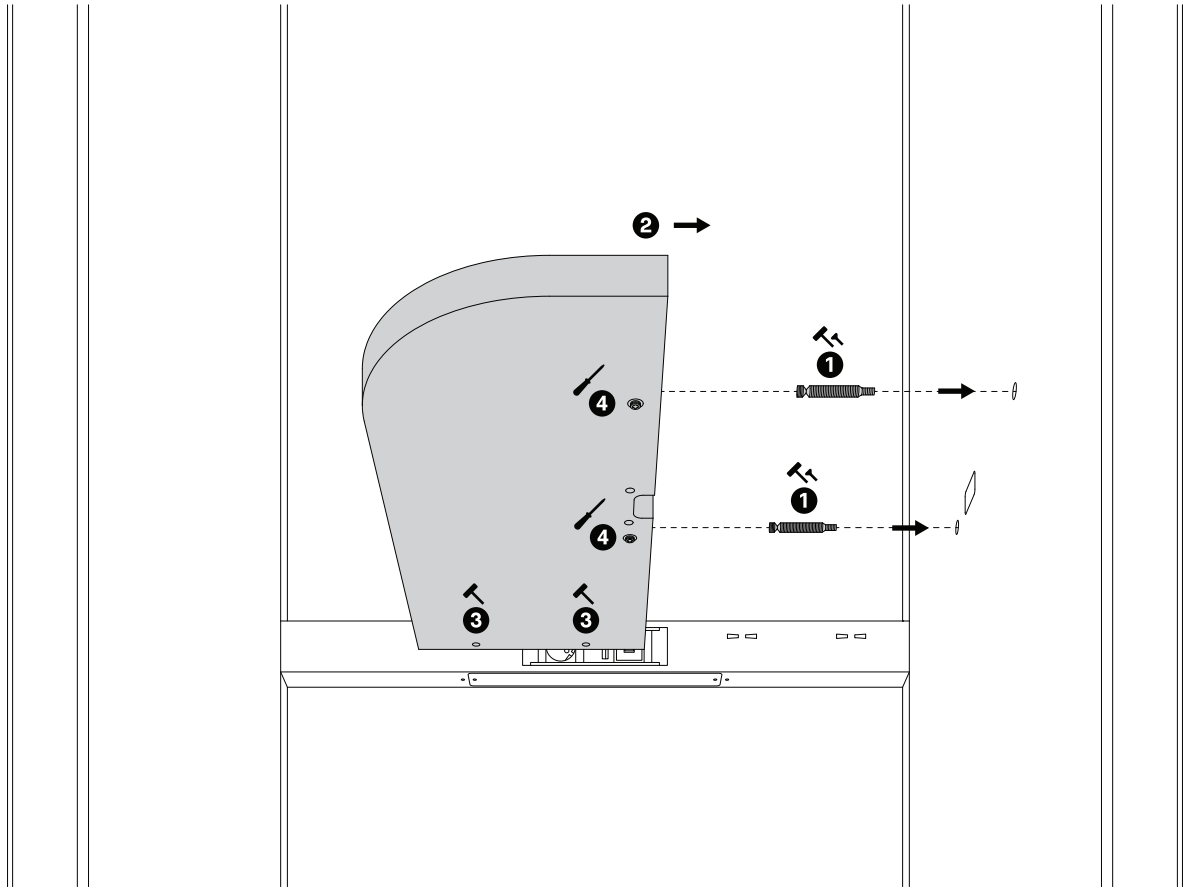

Main Power & Ethernet supply at the back of the pod.

Check if the lighting, ventilation and power sockets are connected properly.

 x2 with
T-Handle Hex Key 5

T-Handle Hex Key 7
Screwdriver (Not Included)

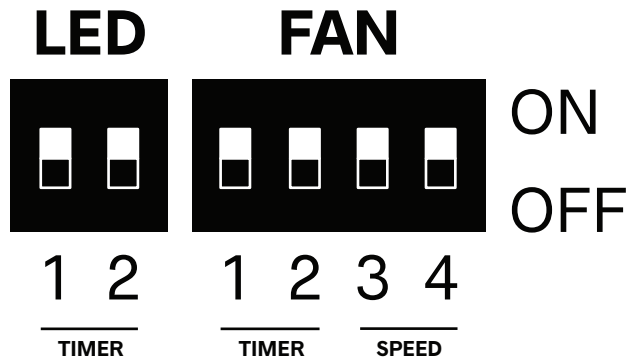

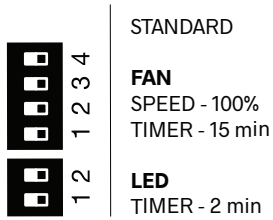

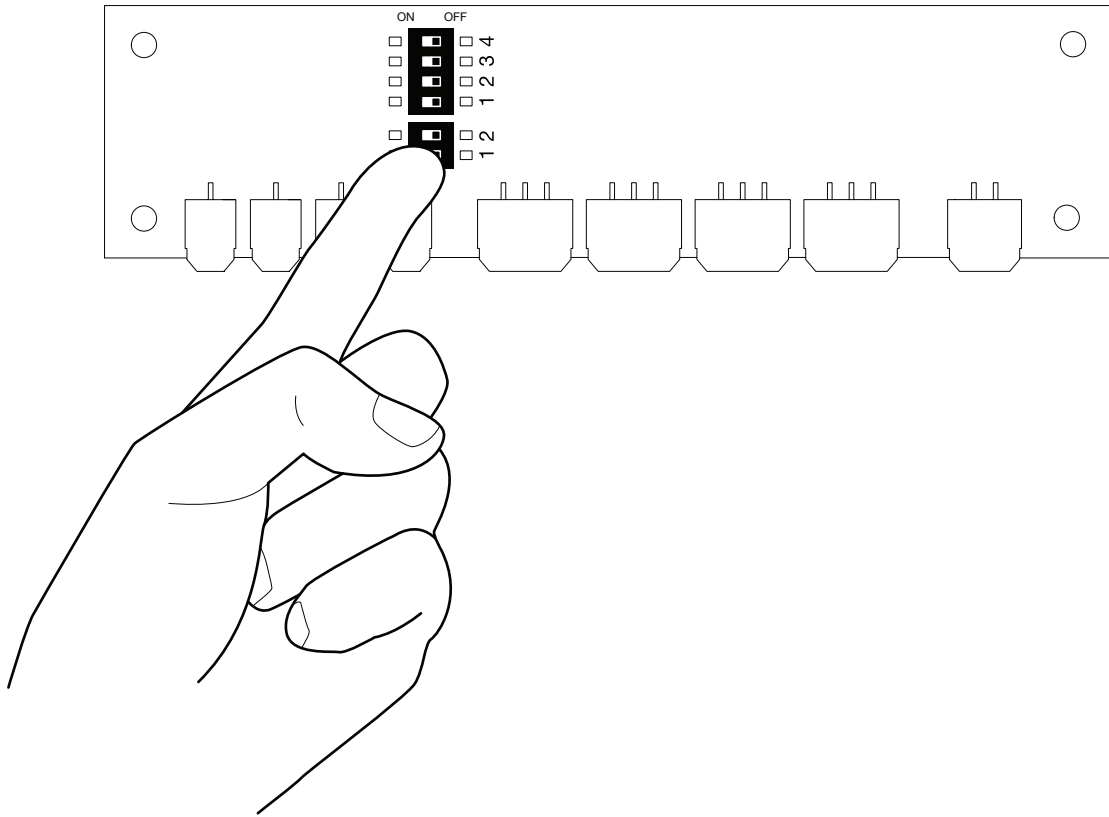

If you are satisfied with the pod's position, you can place the carpets.

If you want to reposition the pod, you have to remove the carpet, if needed, and unlock the legs. When you are satisfied with the pod's position, lock the legs and place the carpets.

Adjustable FAN and LED

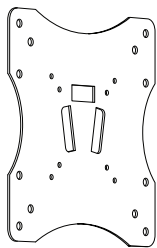

LED

TIMER	1	2
2 min	OFF	OFF
4 min	OFF	ON

5 min	ON	ON	ON	ON	60%

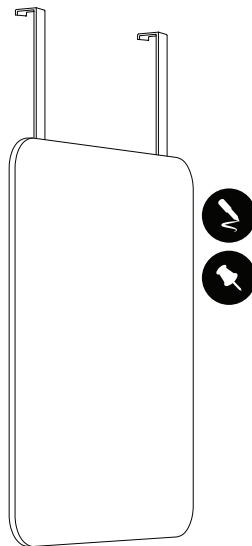

Optional

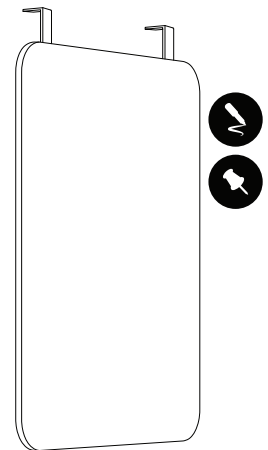

VESA Adapter

Coat Hanger

Exterior Hanging
Writingboard or Pinboard

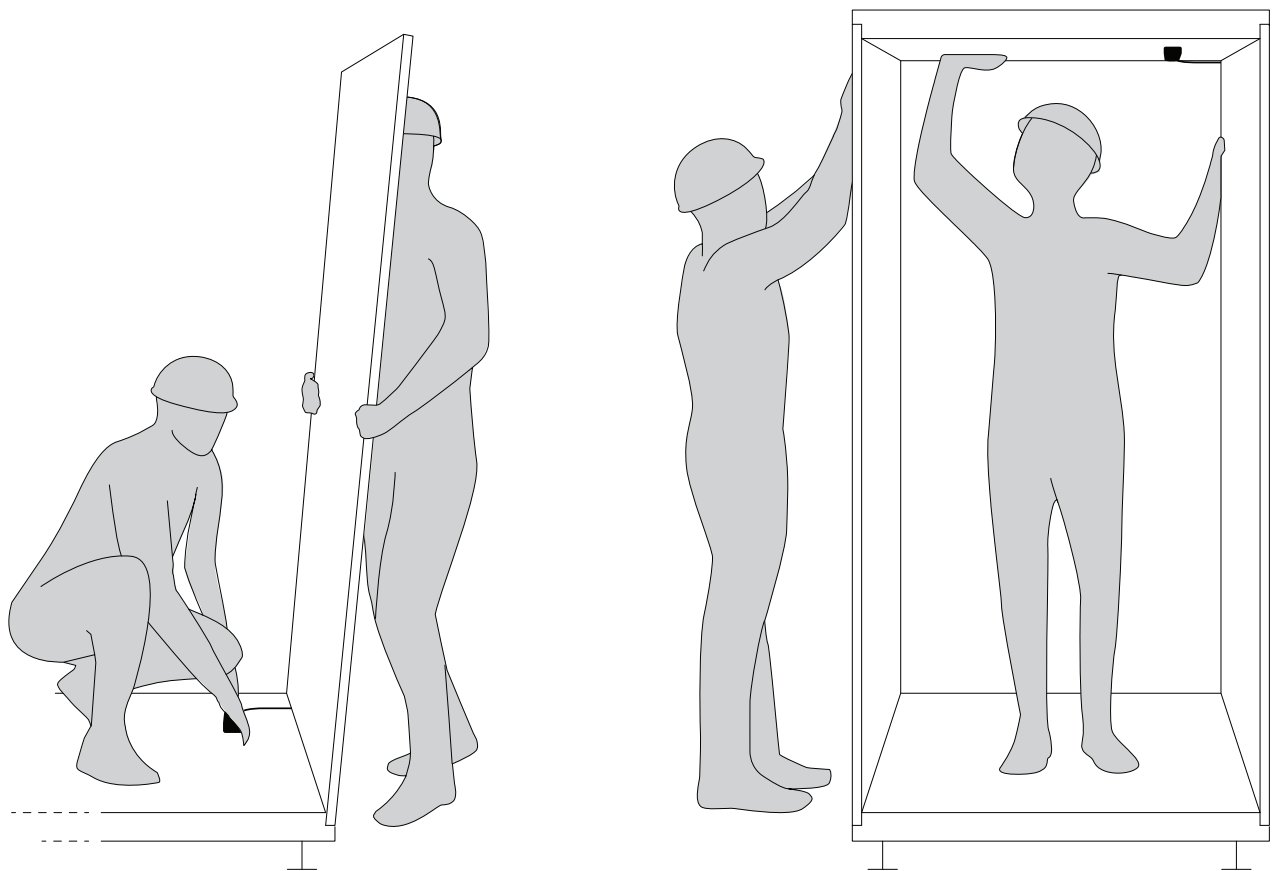

Exterior Hanging
Writingboard or Pinboard

There are multiple features that you can personalize your pod with. You can view them for each Kameleon on our website www.askiafurniture.ro

Scan

You can watch an instructional video of the K1 assembly process. Thanks to the modular design and limited number of components used for each pod, many steps are similar between different Kameleon pods.

Info.

ASSEMBLY INSTRUCTIONS

1 2 3 Steps.

A B C Bag with screws.

 Unlocked.

 Lock.

 Level check.

 Allen key needed.

 Allen key and screws needed.

 T-Handle hex key needed.

 T-Handle hex key and screws needed.

 Position the door on pins.
