T-Handle Hex Key 4

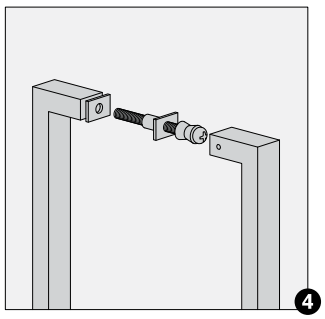
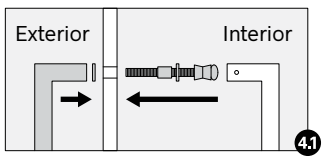
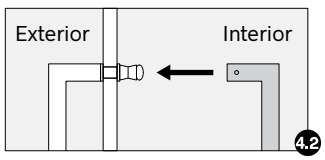
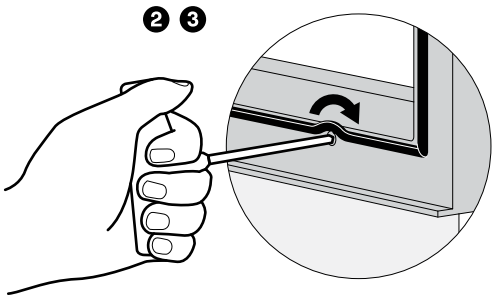
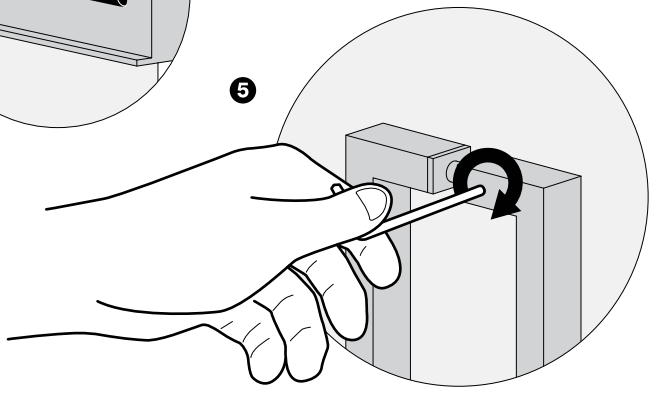
C x2 with
Allen Key 3



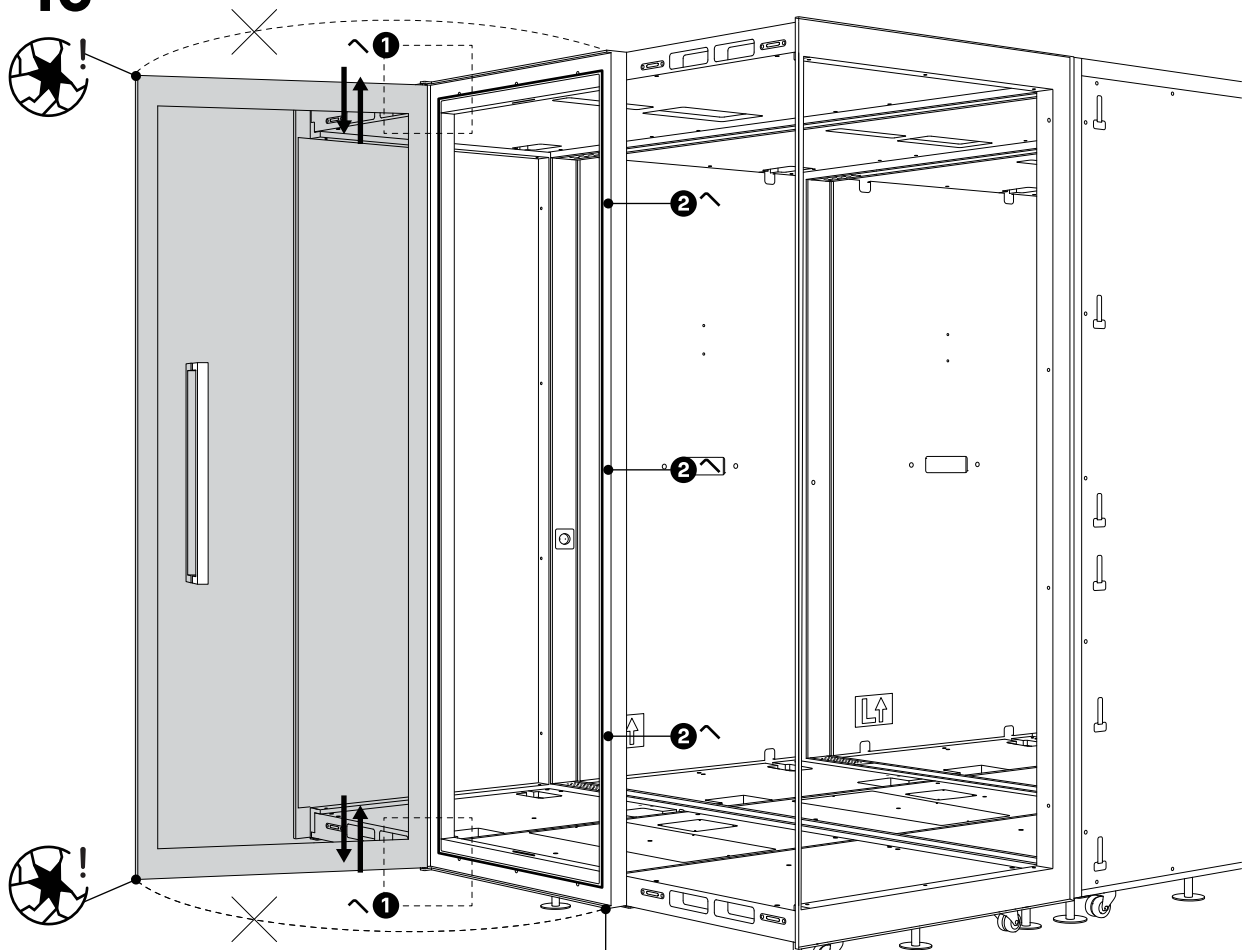








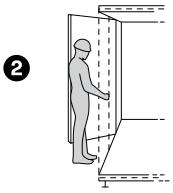
16



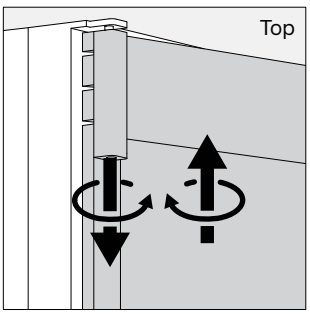
Pay attention not to break the glass door.

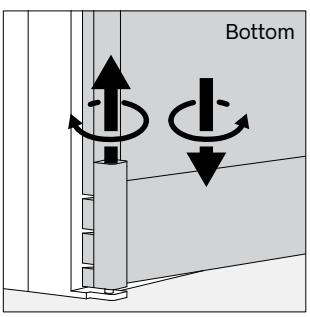
Check if the glass door hits the frame edge before closing it.

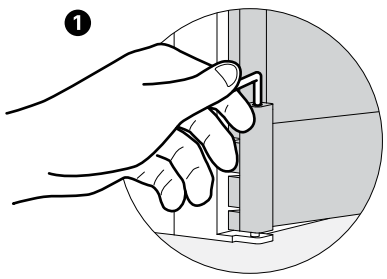
Adjust the glass door if necessary.

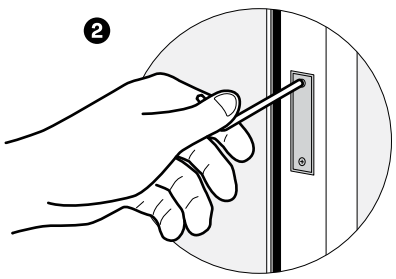


Allen Key 3
Allen Key 2









To adjust the glass door the height must be calibrated. If you need to raise the glass door, you loosen the top hinge and tighten the bottom hinge.

If you need to lower the glass door, you loosen the bottom hinge and tighten the top hinge.

Check if the door closes properly and adjust the door plates if needed.

Tighten or loosen the plates when needed.

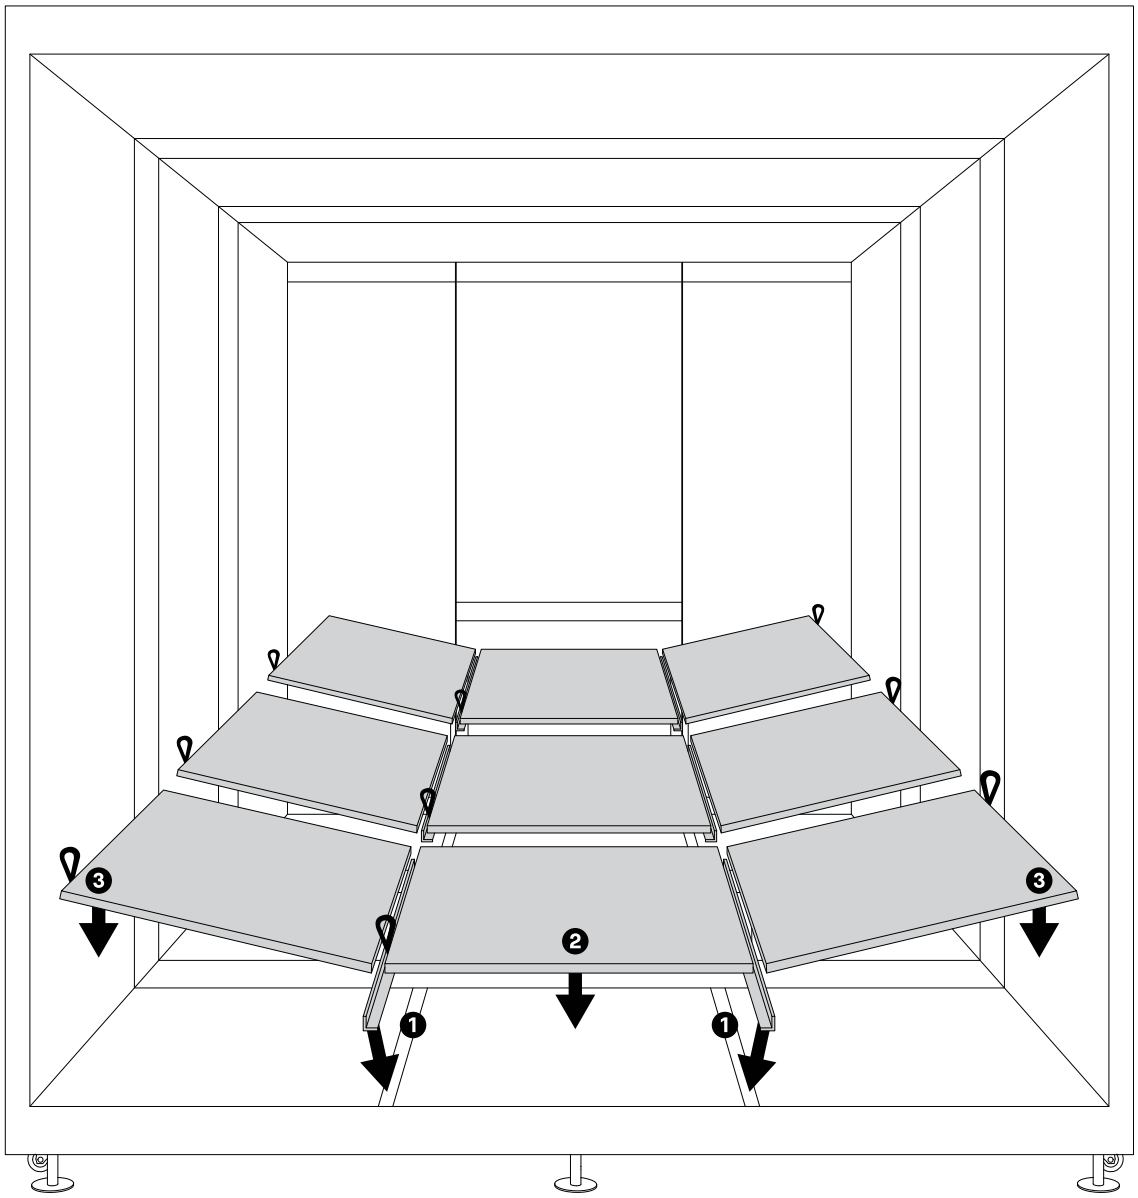
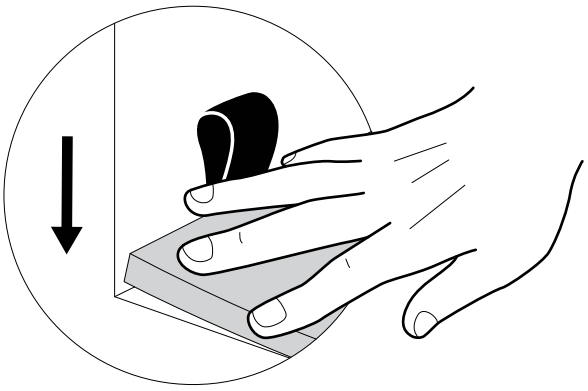
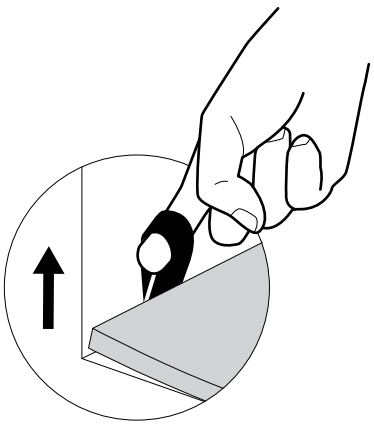
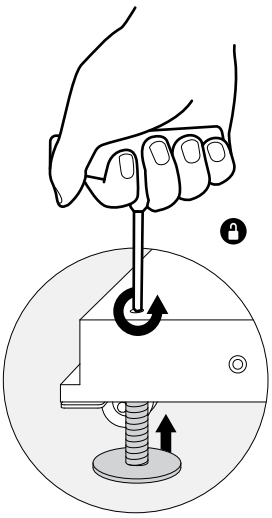
23









If you are satisfied with the pod's position, you can place the carpets.

If you want to reposition the pod, you have to remove the carpet, if needed, and unlock the legs. When you are satisfied with the pod's position, lock the legs and place the carpets.

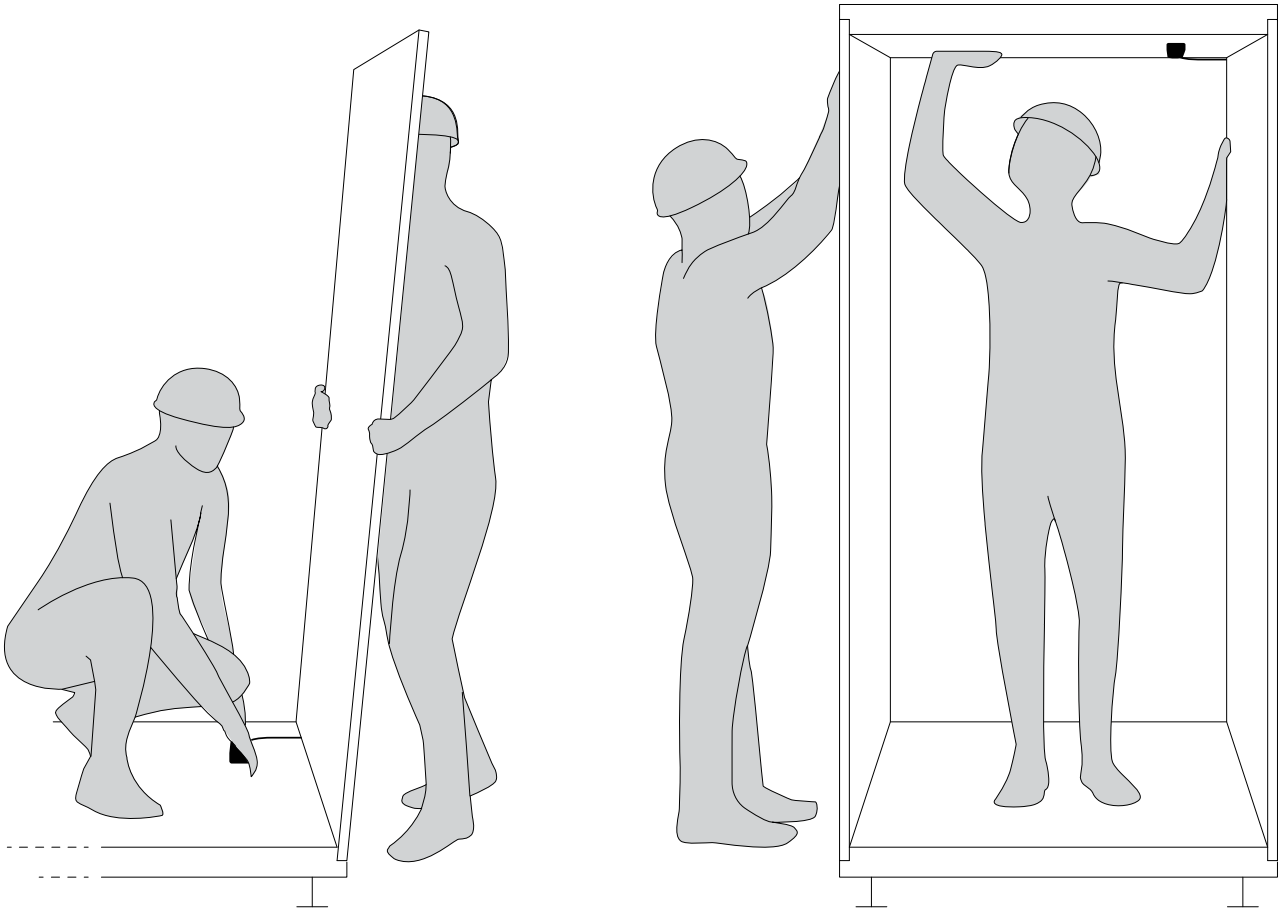
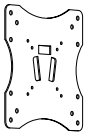
Scan

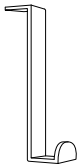


You can watch an instructional video of the K4 assembly process.
Thanks to the modular design and limited number of components used for each pod, many steps are similar between different Kameleon pods.

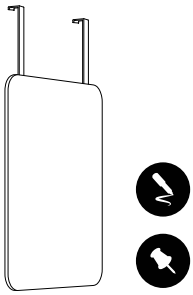
Optional



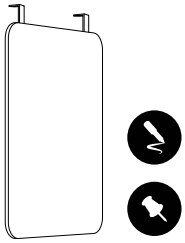
VESA Adapter



Coat Hanger



Exterior Hanging
Whiteboard or Pinboard



Interior Hanging
Whiteboard or Pinboard

There are multiple features that you can personalize your pod with. You can view them for each Kameleon on our website www.askiafurniture.ro
