

In these ever evolving times, workspaces are changing frequently, adapting to one's needs and values.

The **CONNECT** screen collection offers a wide range of solutions for room and desk partitioning. Just connect the panels and you can create your own work environment, private meeting room or just separate the workspace. With three levels of sound absorbancy capabilities available, these panels offer more than just visual separation from the work environment. They also increase acoustic comfort, helping you focus better on your work.

With vast knowledge and great attention to detail, ARS (AŞKIA Research Studio) develops home and office furniture that improves spaces.

ACOUSTIC PROPERTIES SYMBOLS

Attenuation

Materials that reflect sound with less energy, reducing the amplitude of the sound bounced back, reducing echoes in a room.

Diffusion

A surface or material that has irregularities and reflects sound in multiple trajectories, reducing sound's focalized target.

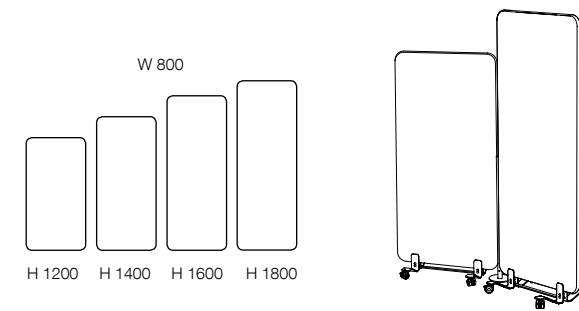

Absorption

The ability of a material to dissipate sound inside of its internal structure and absorb the sound. Materials with porous and fibrous natures present excellent sound absorption properties.

Set up your space exactly the way you want it.

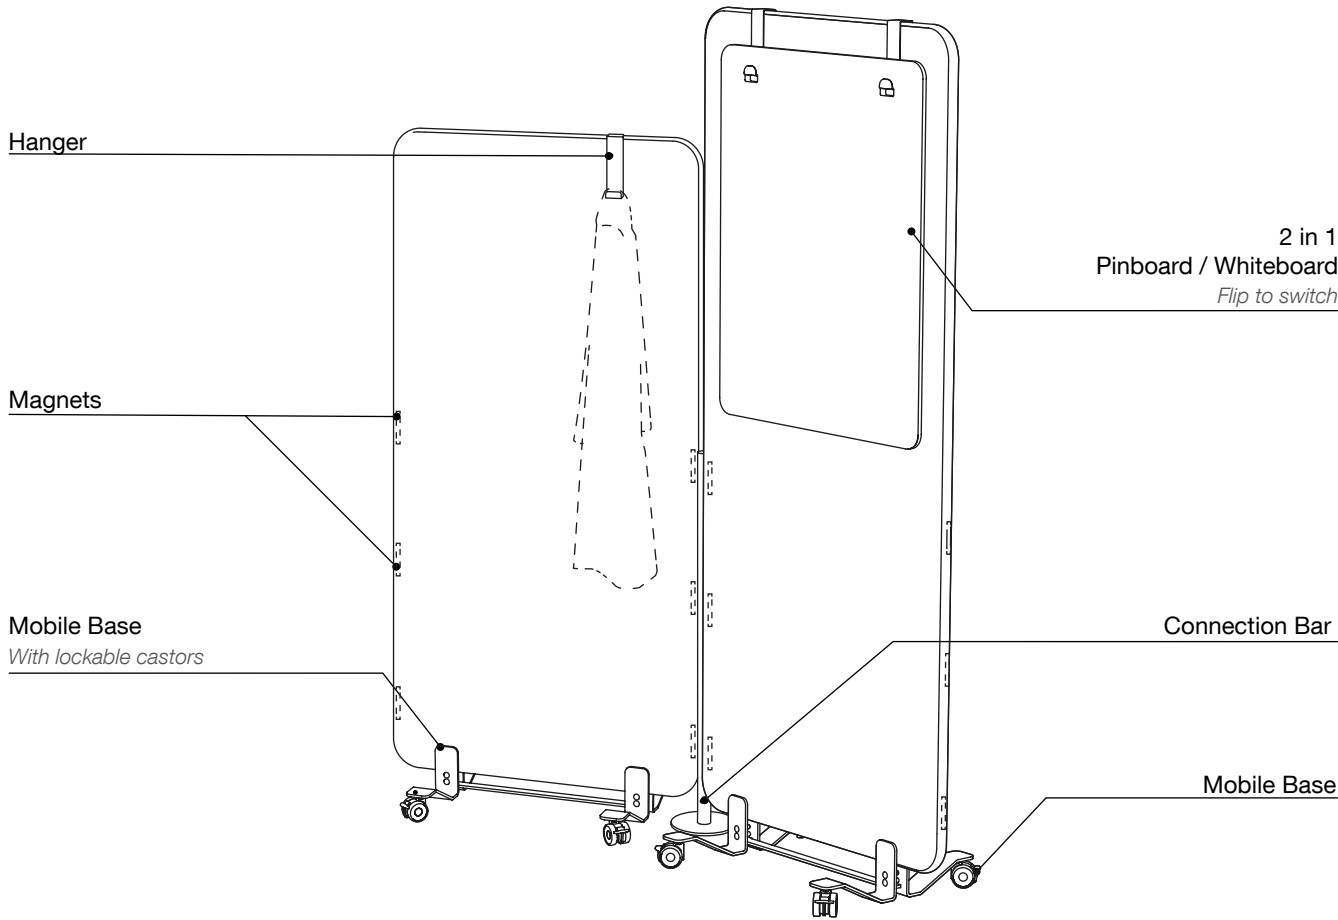

The **CONNECT FLEXI** collection comes in 4 height options, with 2 types of bases and numerous customization possibilities. The best feature of these screens consists in the magnetic connection system. With the help of a vertical connector and magnets embedded in the screens, they can be attached, leading to various angles and configurations for your space.

The screens can be equipped with a **2 in 1 Pinboard and Whiteboard** panel or with a clothes **hanger**.

FRONT SCREEN
by ARS

MANAGERIAL DESK
by ARS

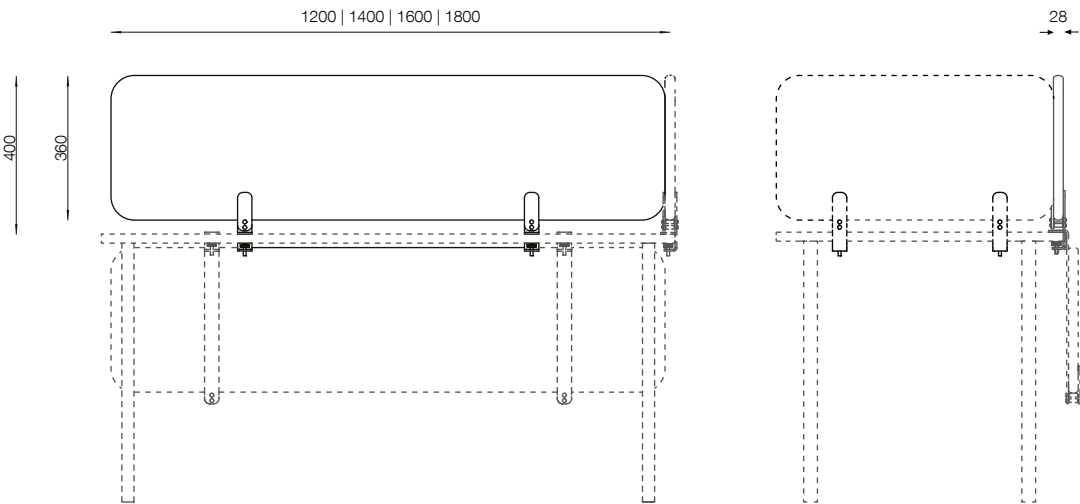

The **FRONT SCREENS** share the same versatility and performance as our other screens.

Their installation on the desk is just as simple as it is in the case of our other **CONNECT** screens. Place the screen on the already mounted base on the desk and enjoy a quiet space.

MODESTY SCREEN

Attenuation

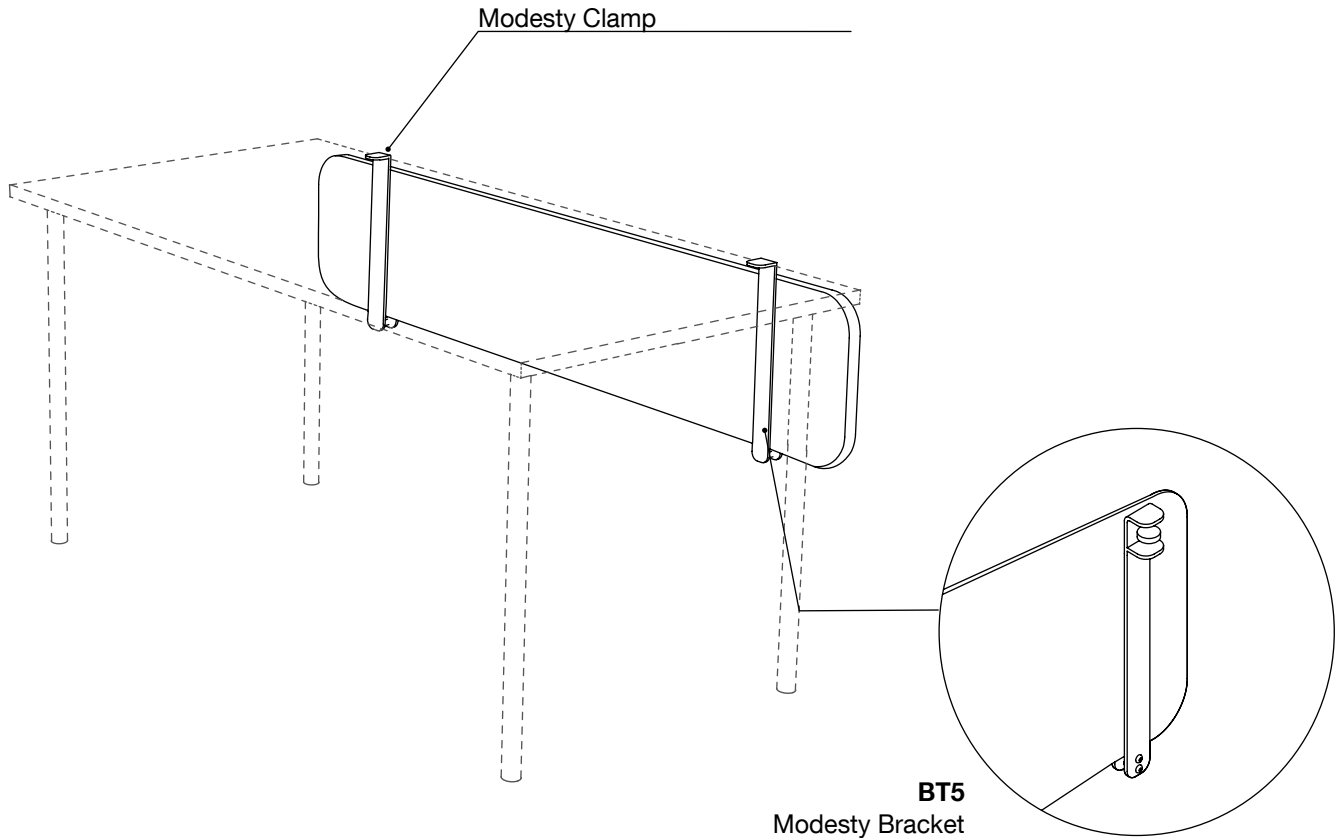

Absorption

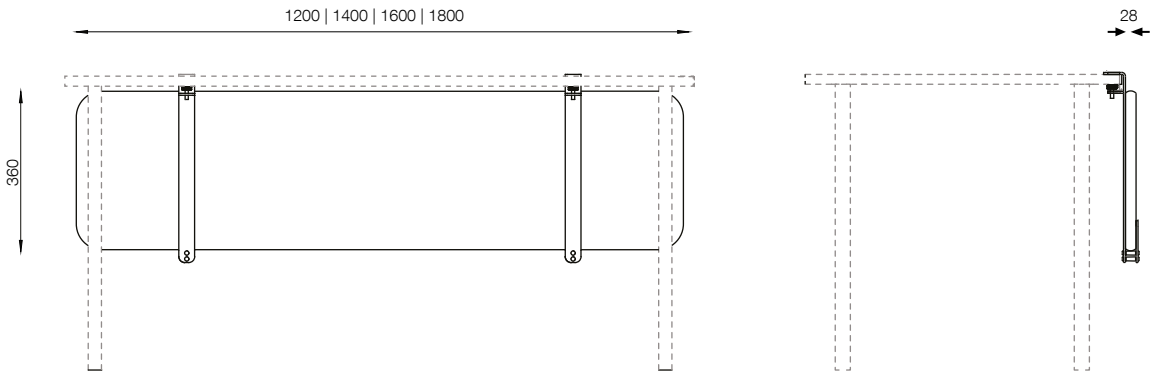

Create your own workspace,
connect with your work.

The **MODESTY SCREENS** share the same qualities as our vertical screens, but with another purpose. These screens offer more than a visual partition in your office, giving you, your own personal space while working, and separating the lower part of your desk from the rest.

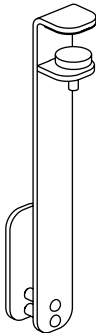

TECHNICAL DETAILS

fits any conventional desk

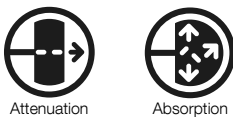

BASE TYPE
