Allen Key 3

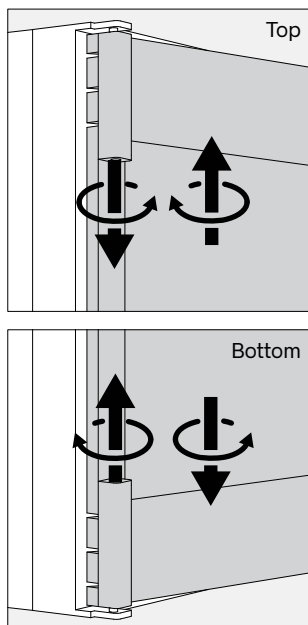

8

Pay attention not to break the glass door.

Pay attention not to break the glass door.

Check if the glass door hits the frame edge before closing it.

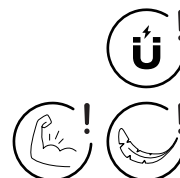

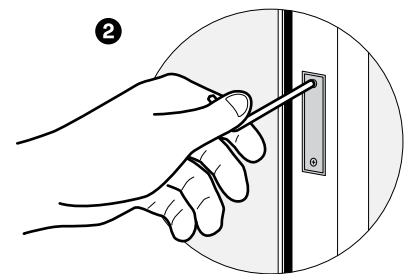

Adjust the glass door if necessary.

To adjust the glass door the height must be calibrated. If you need to raise the glass door, you loosen the top hinge and tighten the bottom hinge.

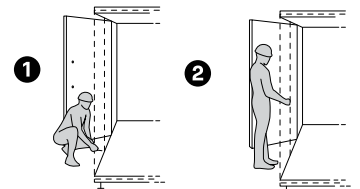

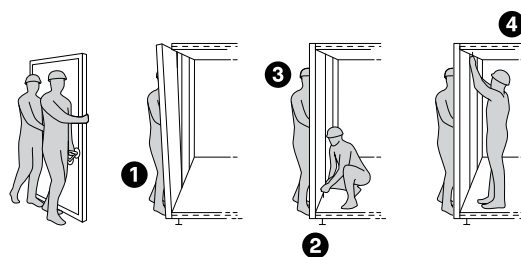

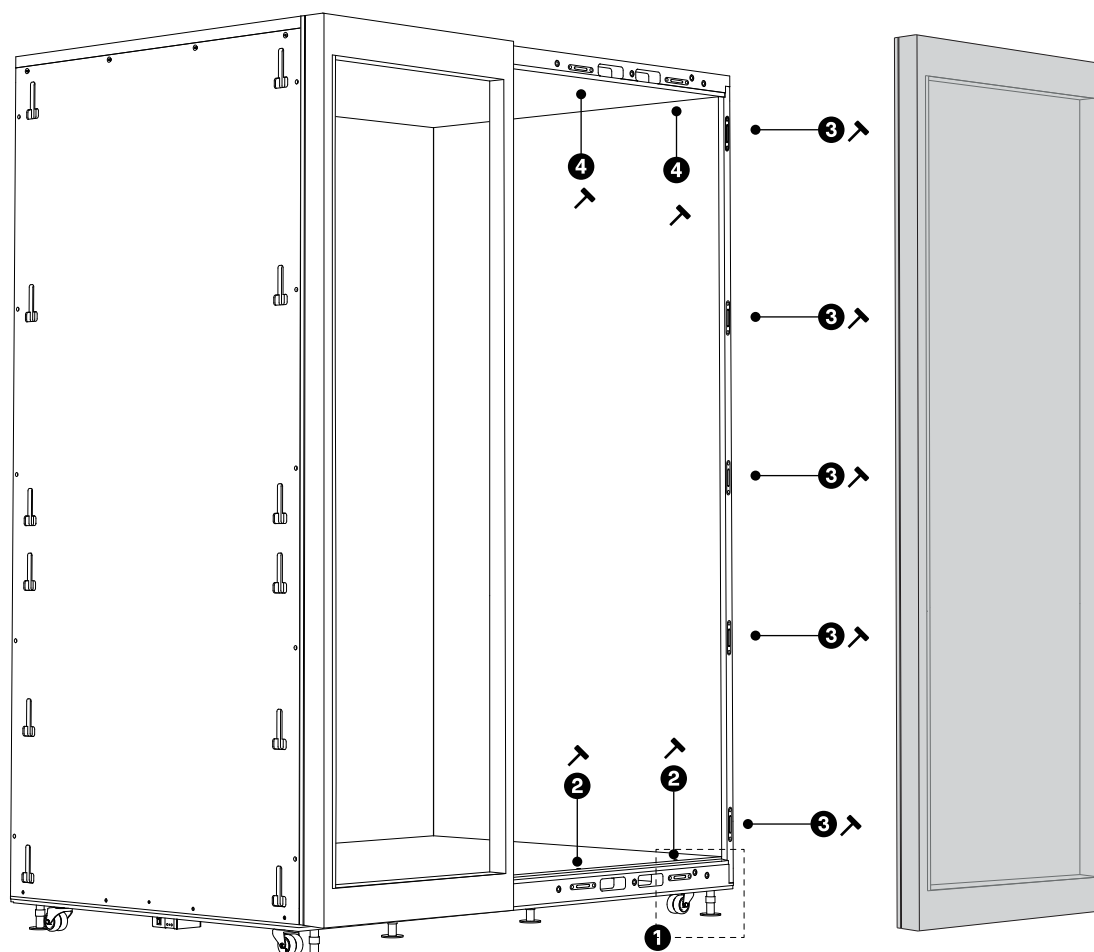

If you need to lower the glass door, you loosen the bottom hinge and tighten the top hinge.

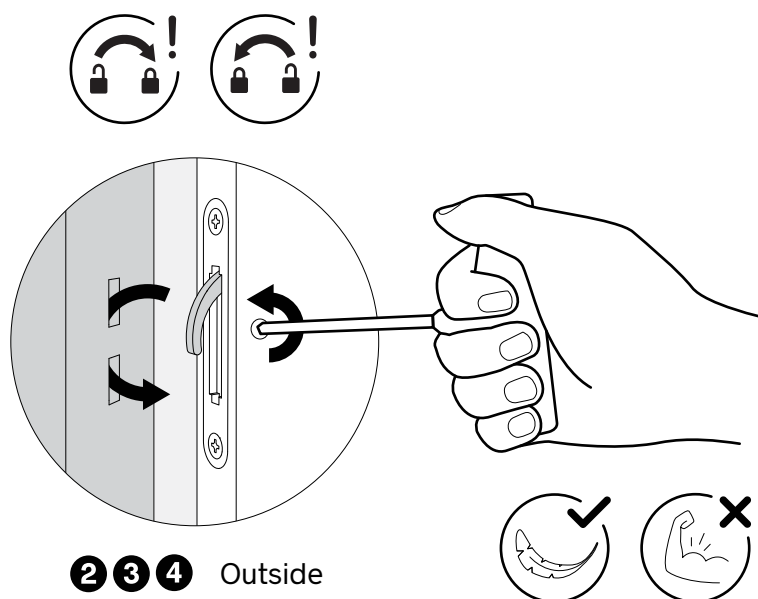

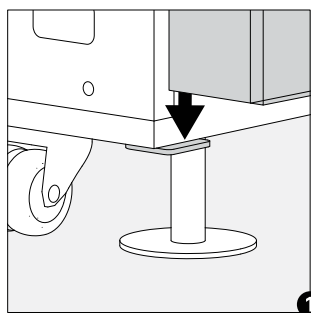

Check if the door closes properly and adjust the door plates if needed.

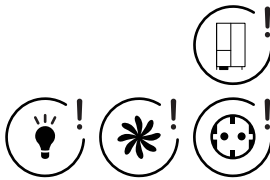

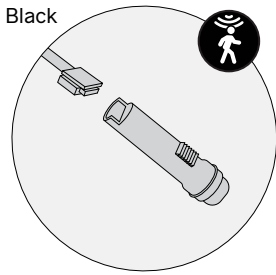

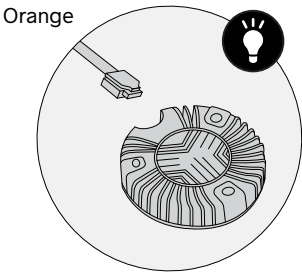

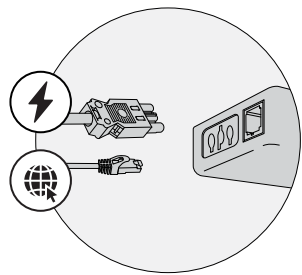

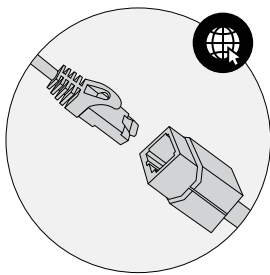

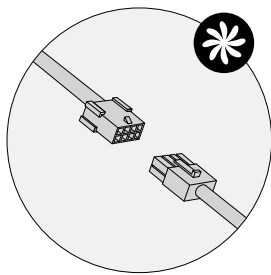

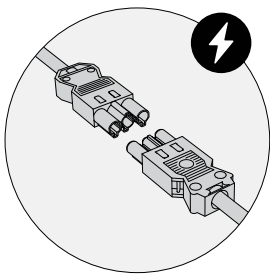

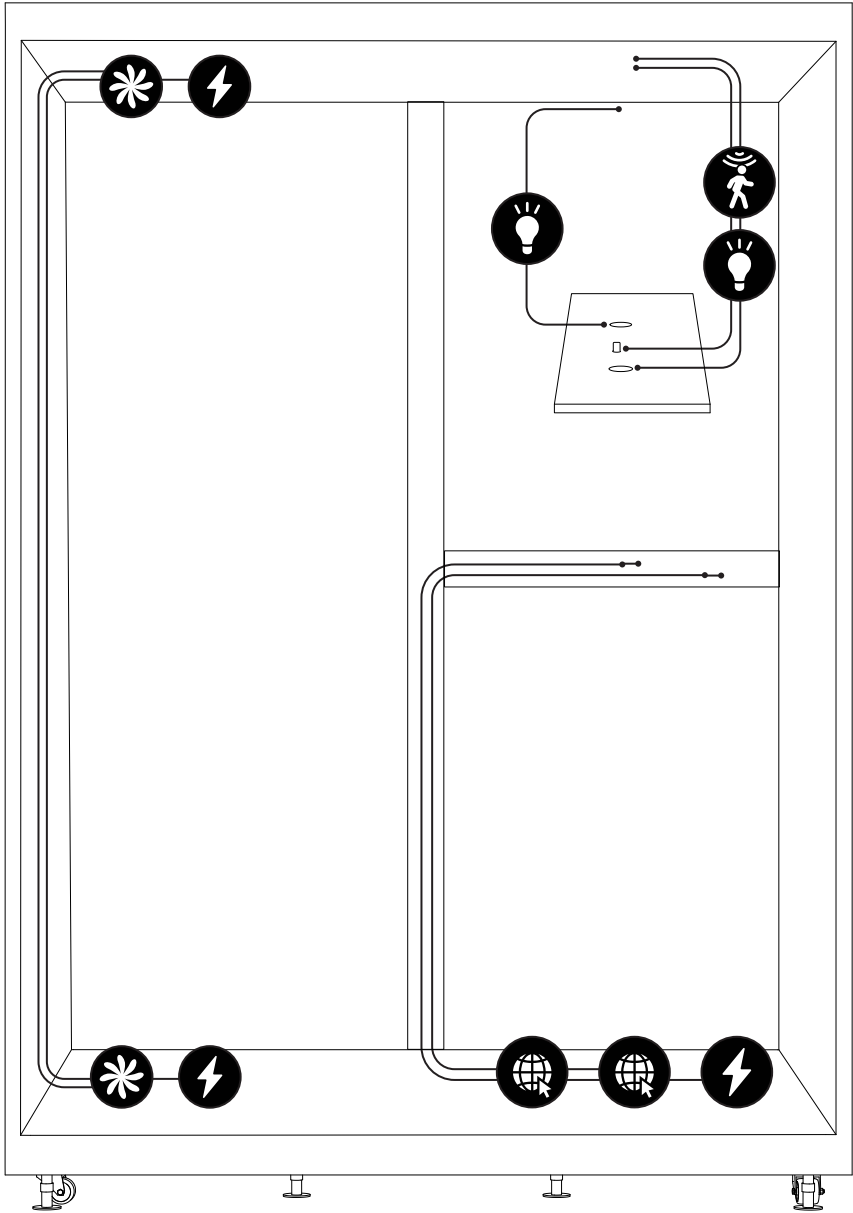

Tighten or loosen the plates when needed.

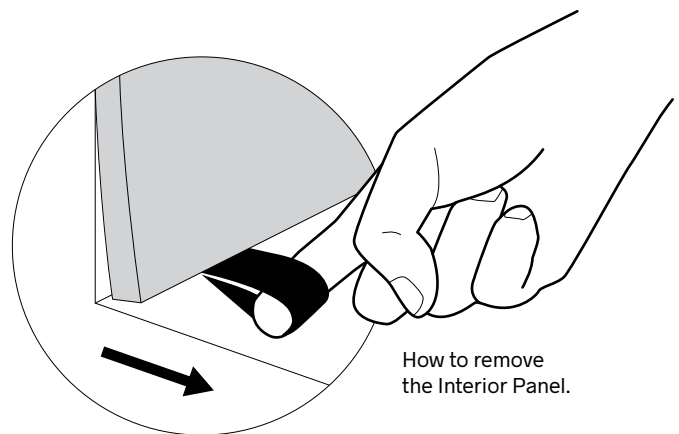

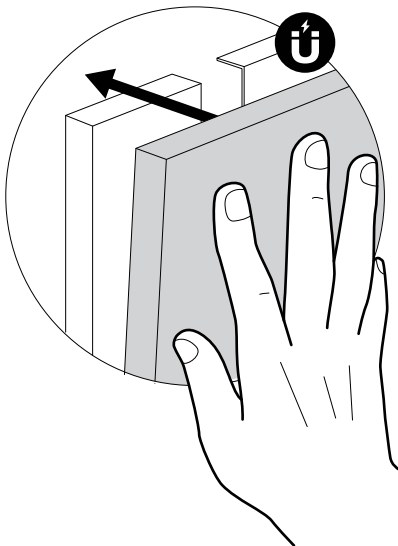

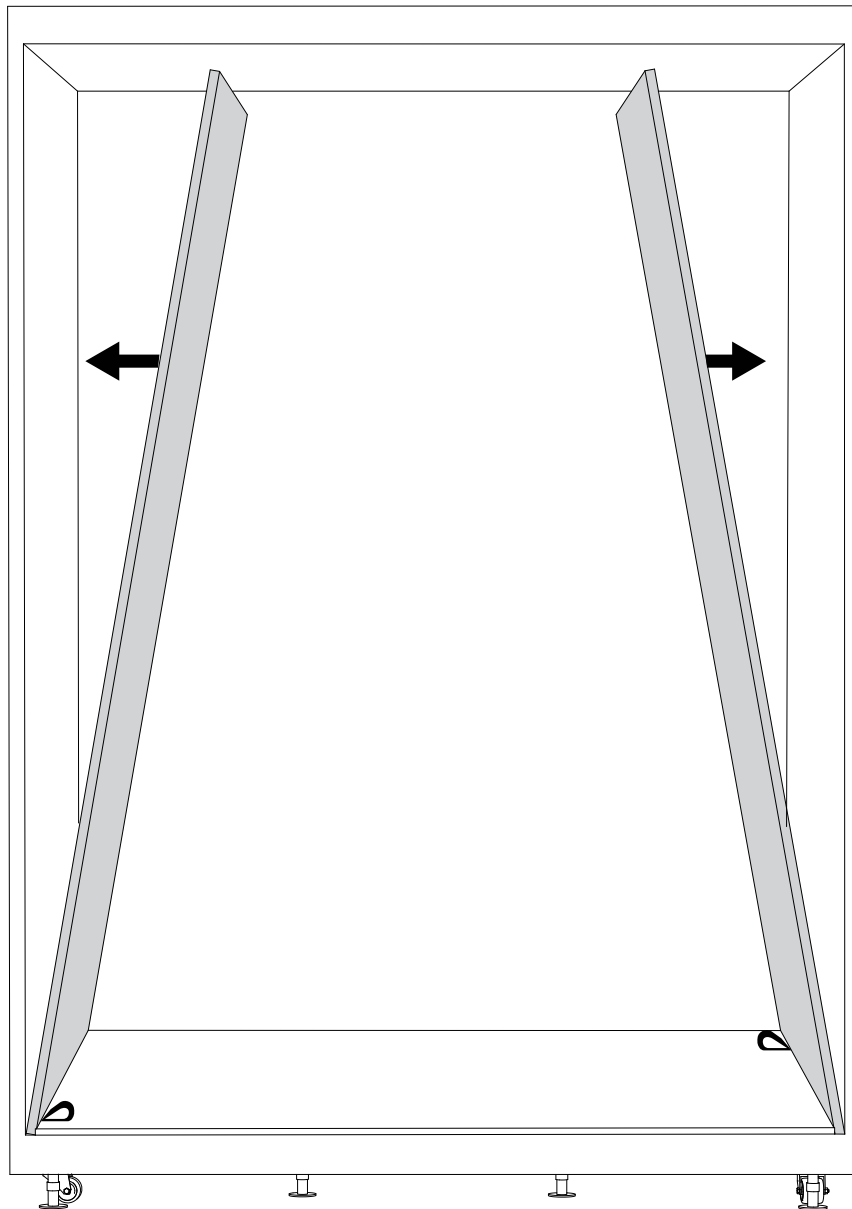

T-Handle Hex Key 7
Suction cup handles

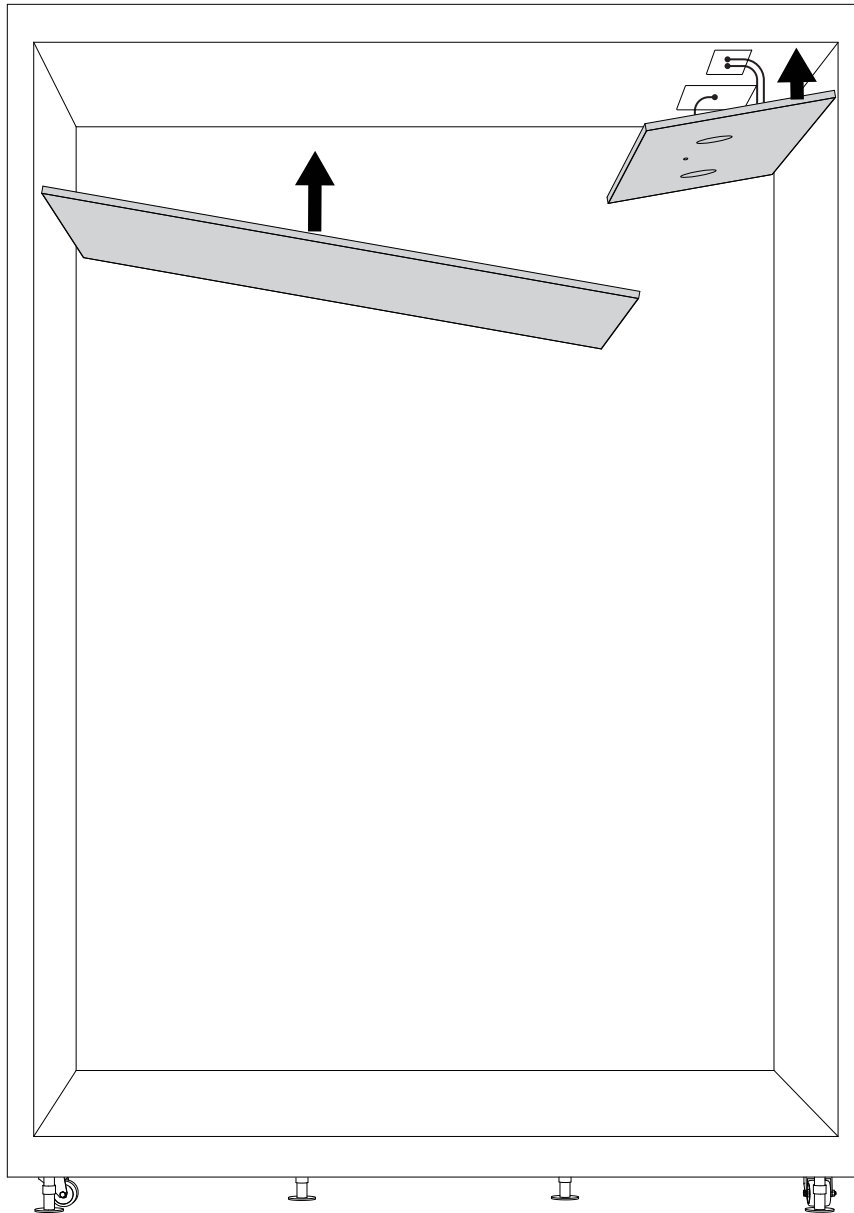

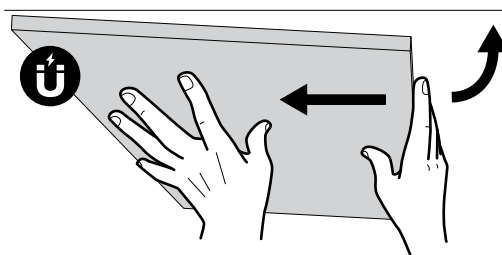

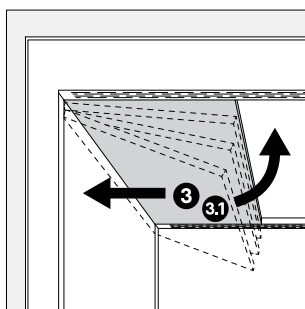

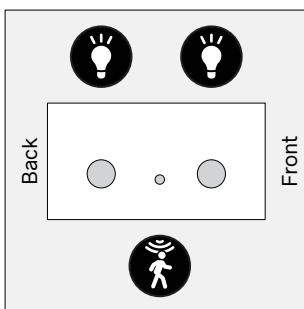

Main Power & Ethernet supply at the back of the pod.

Check if the lighting, ventilation and power sockets are conected properly.

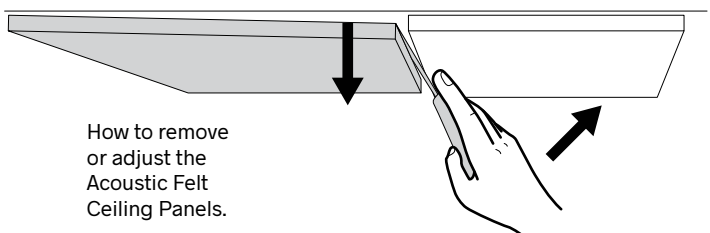

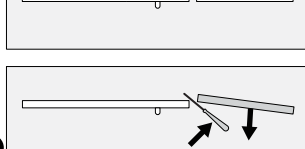

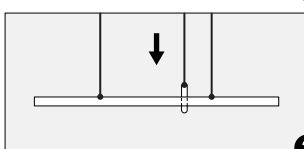

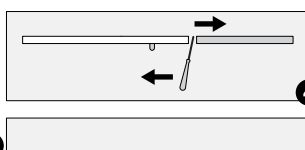

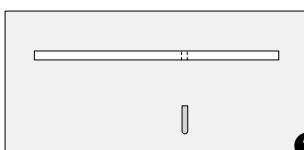

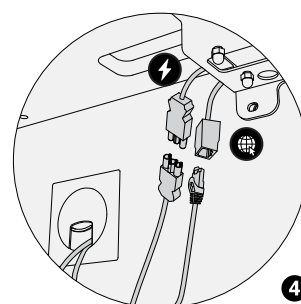

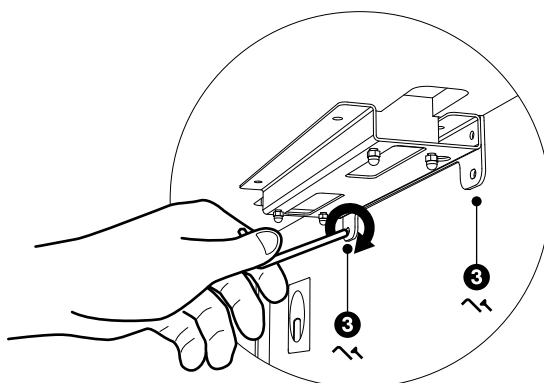

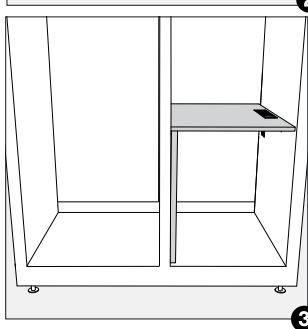

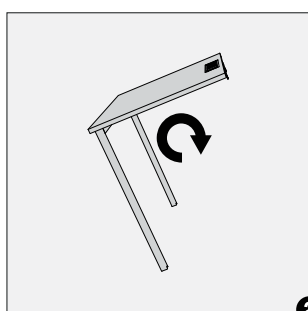

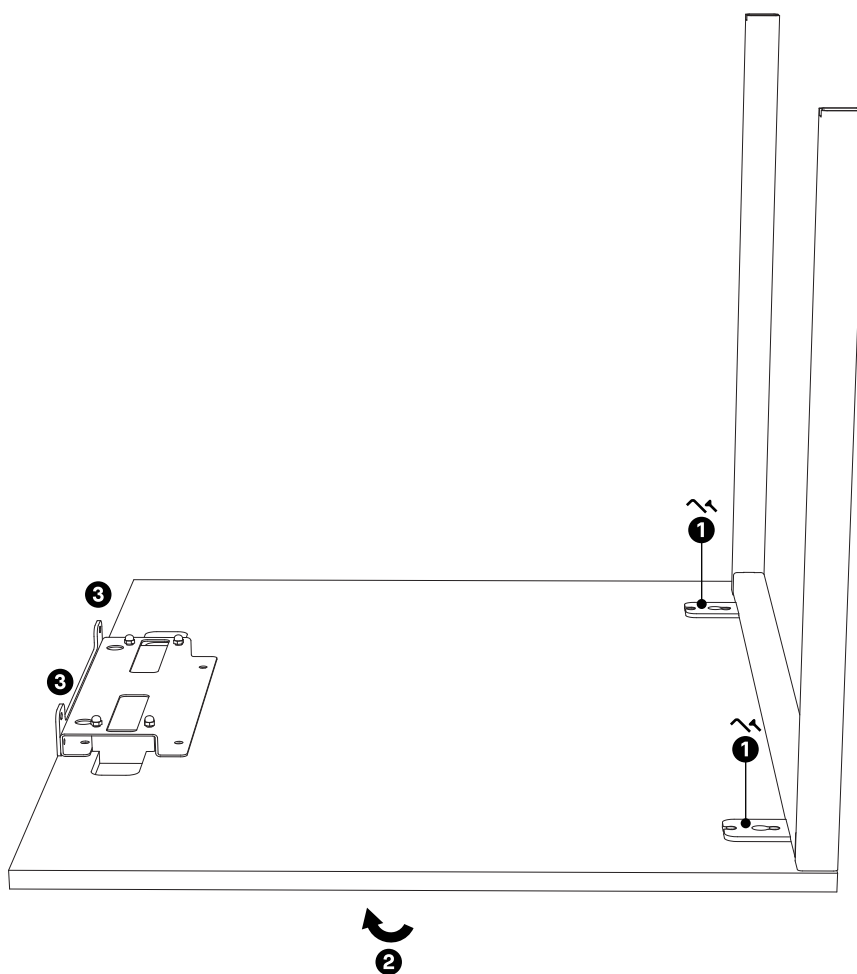

Ceiling Panels Adjuster

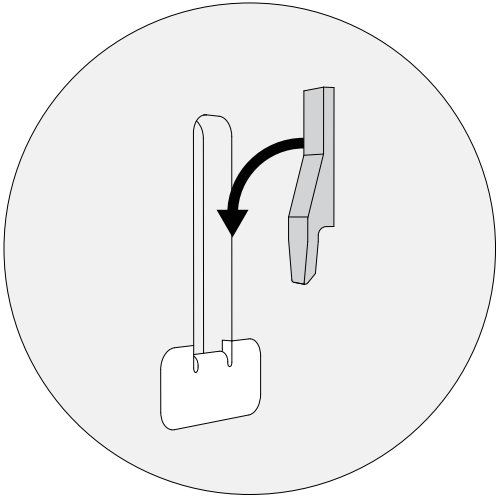

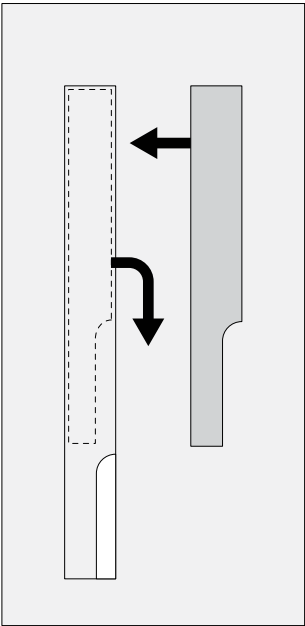

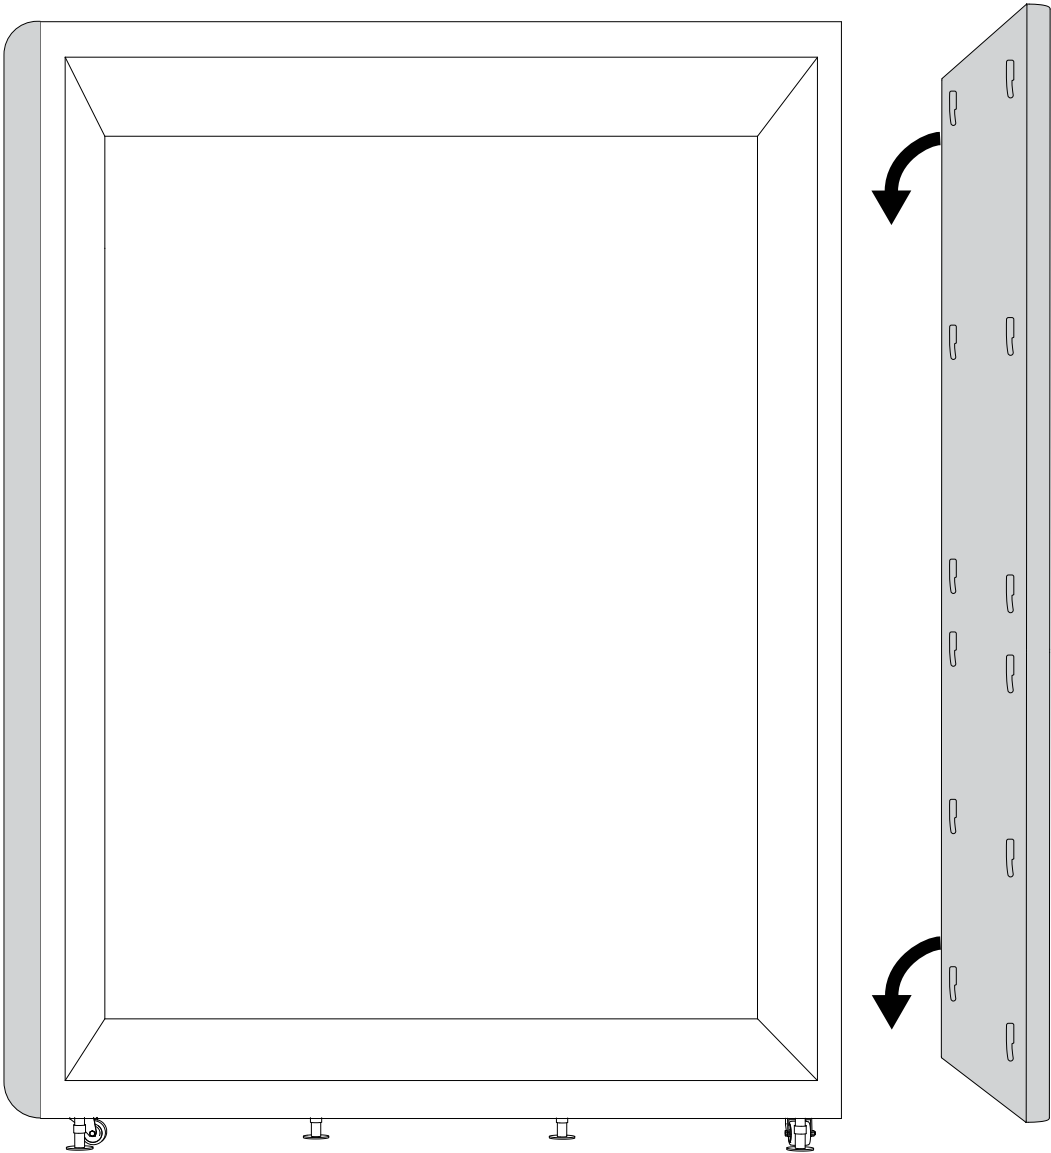

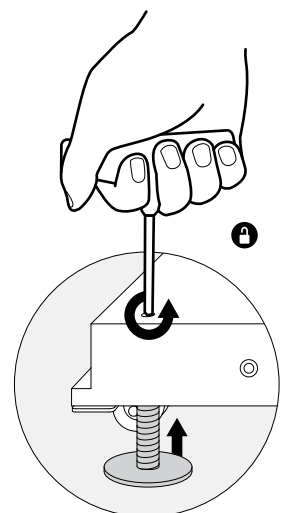

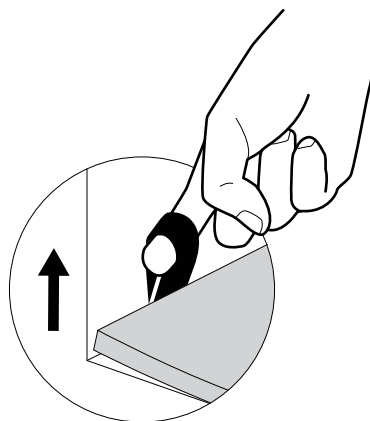

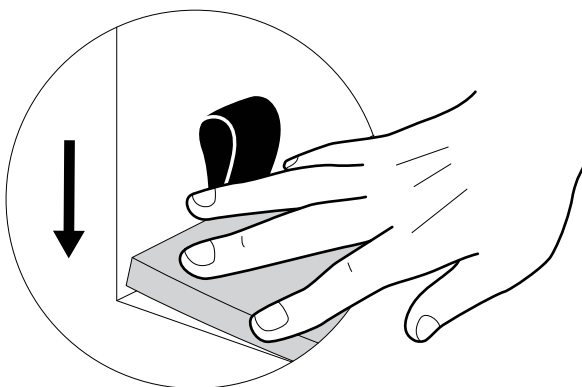

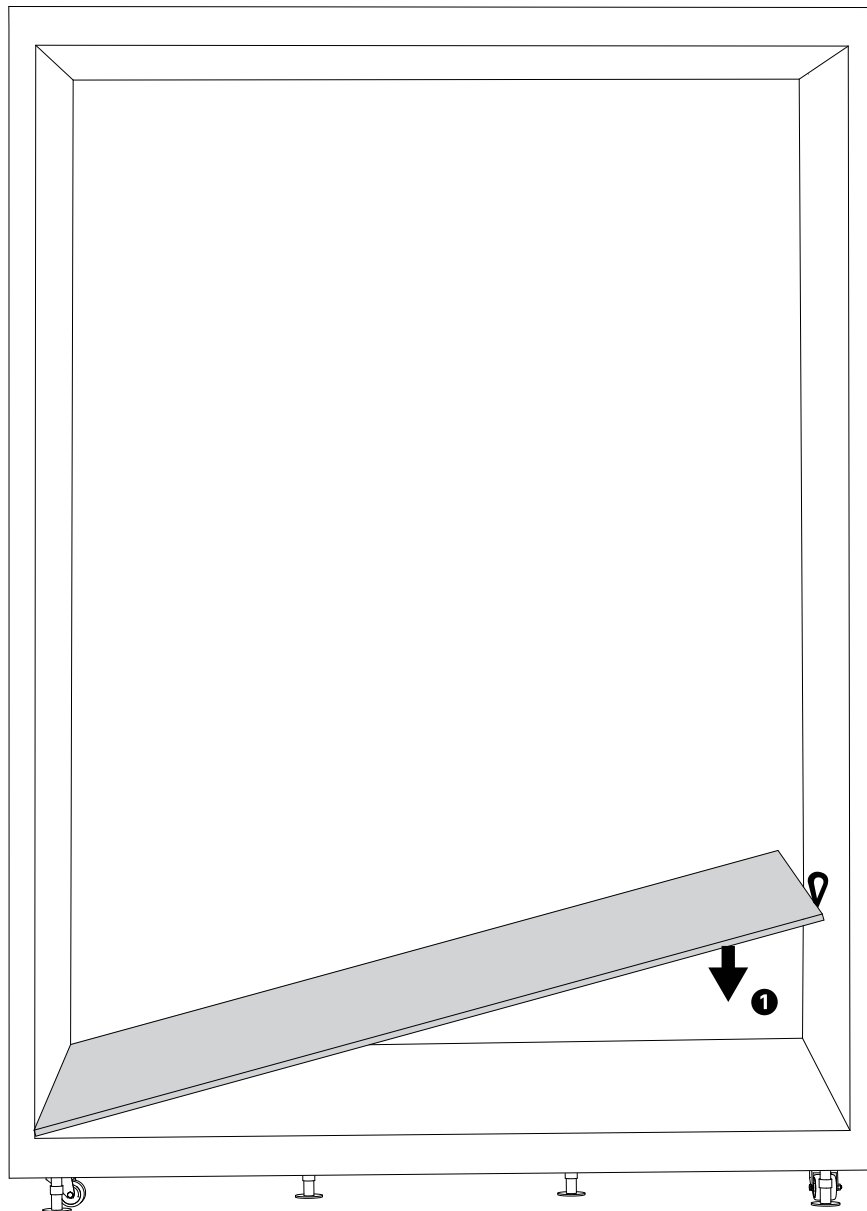

How to place the Acoustic Felt Ceiling Panels.

How to remove or adjust the Acoustic Felt Ceiling Panels.

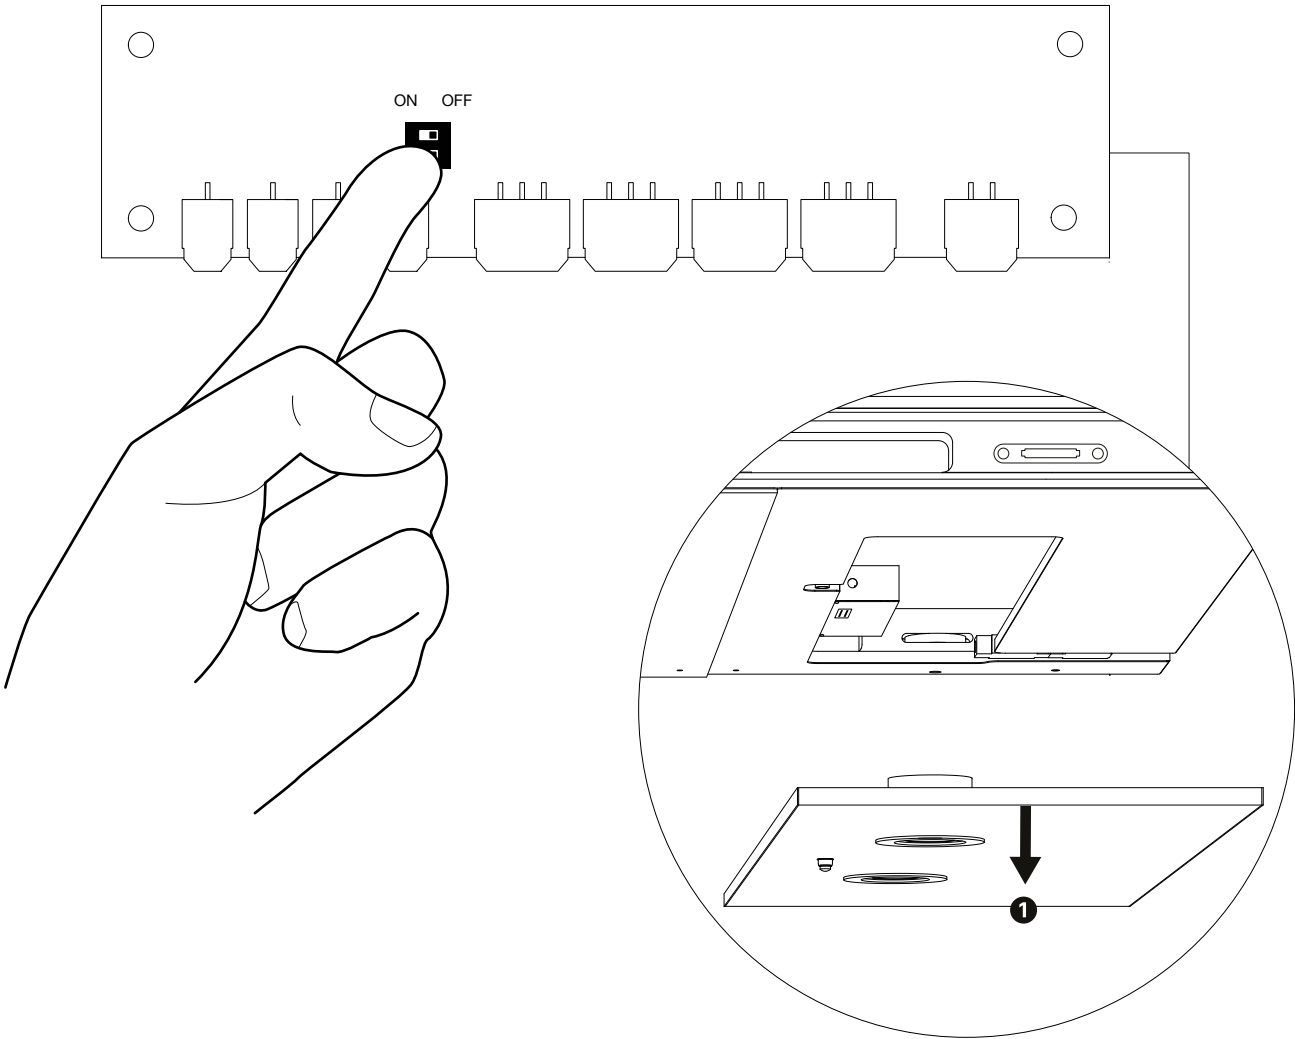

If you are satisfied with the pod's position, you can place the carpets.

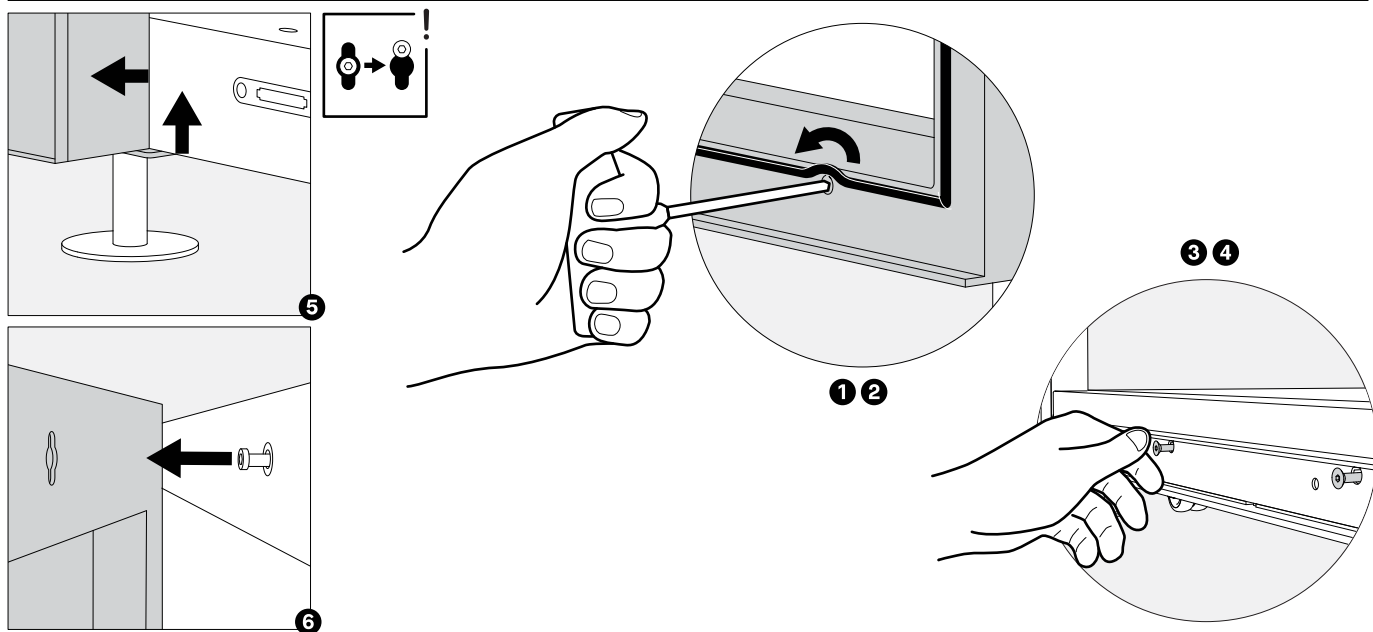

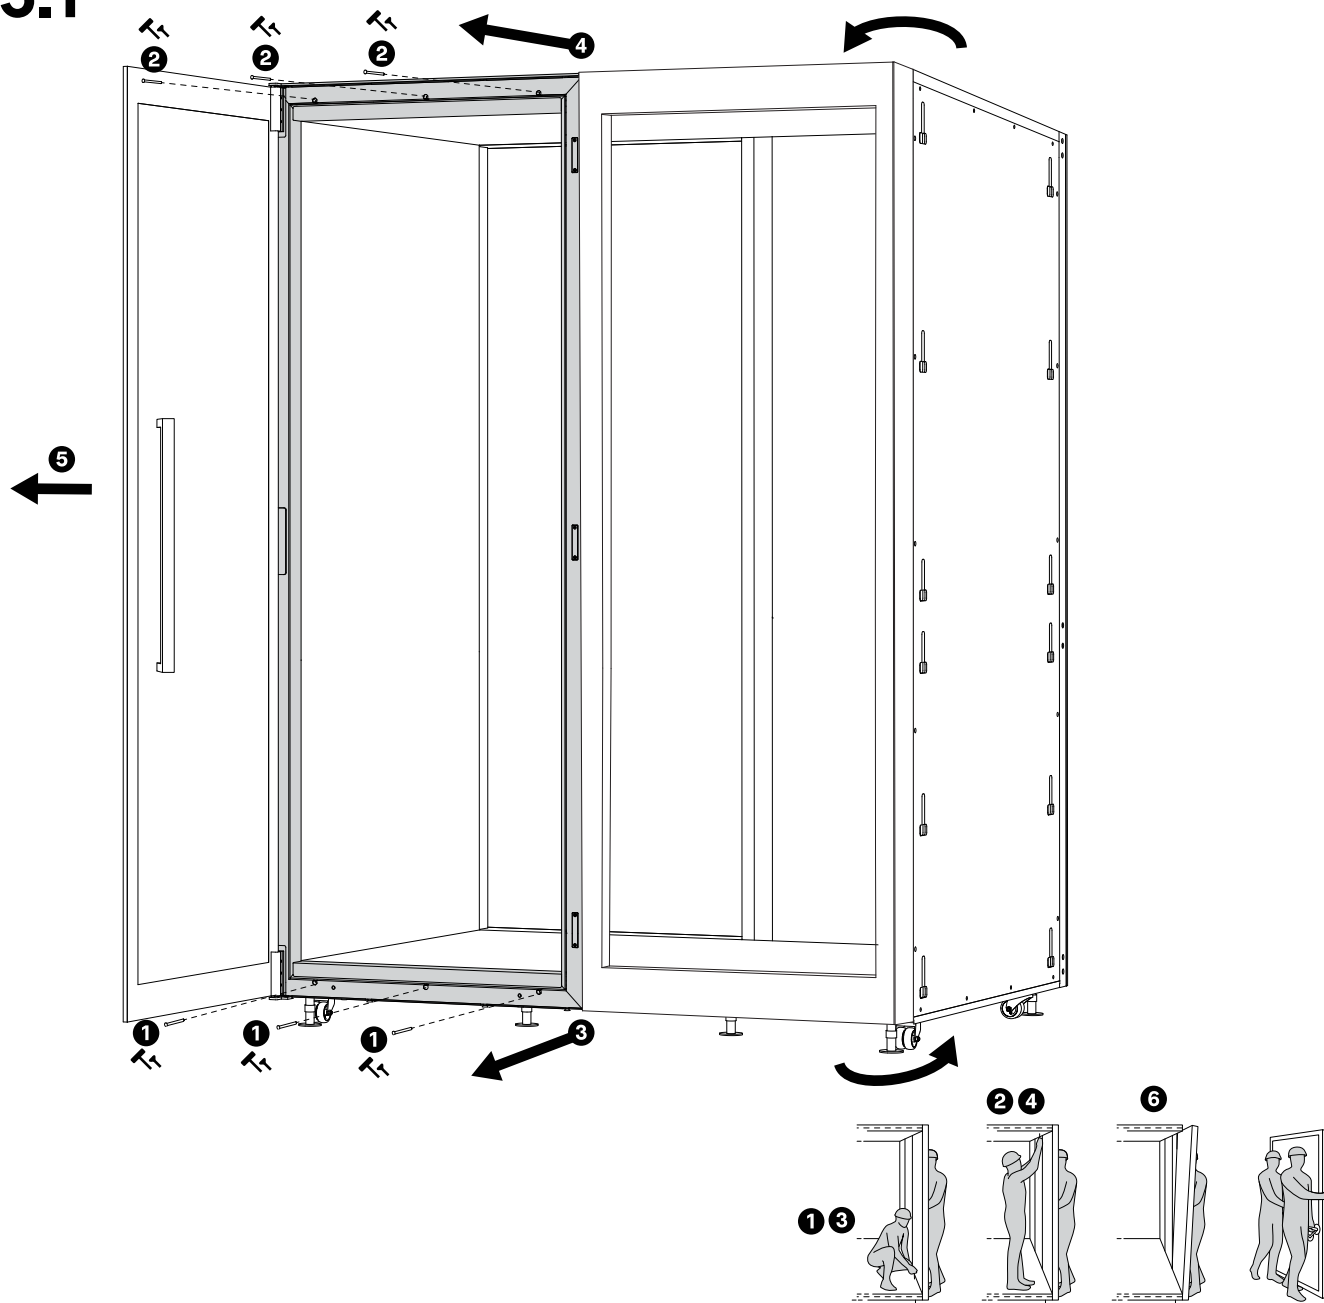

If you want to reposition the pod, you have to remove the carpet, if needed, and unlock the legs. When you are satisfied with the pod's position, lock the legs and place the carpets.

Adjustable FAN and LED

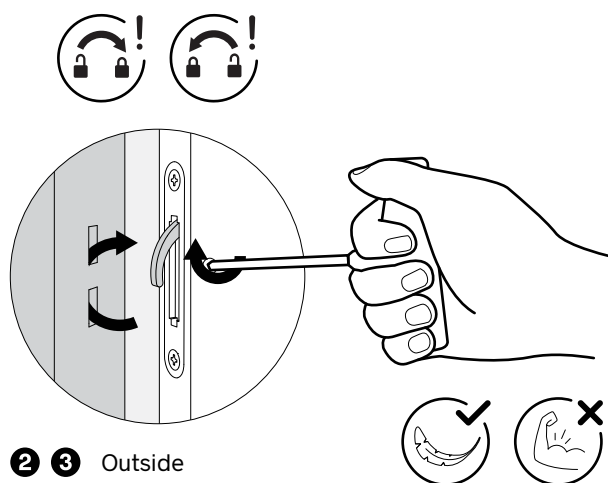

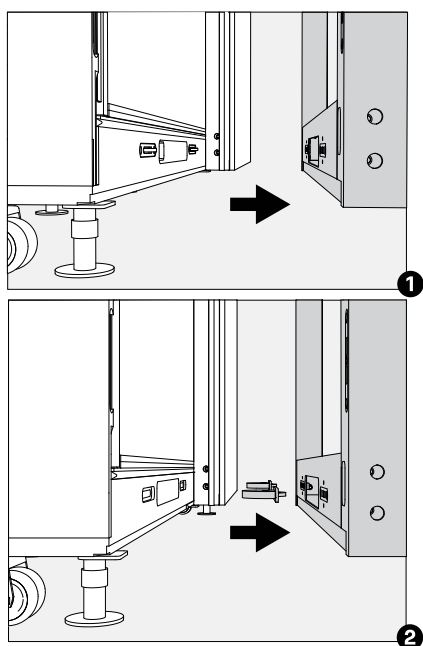

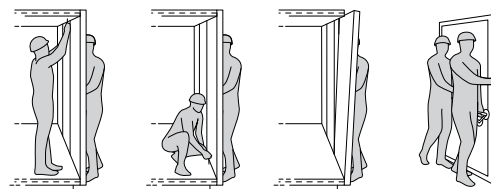

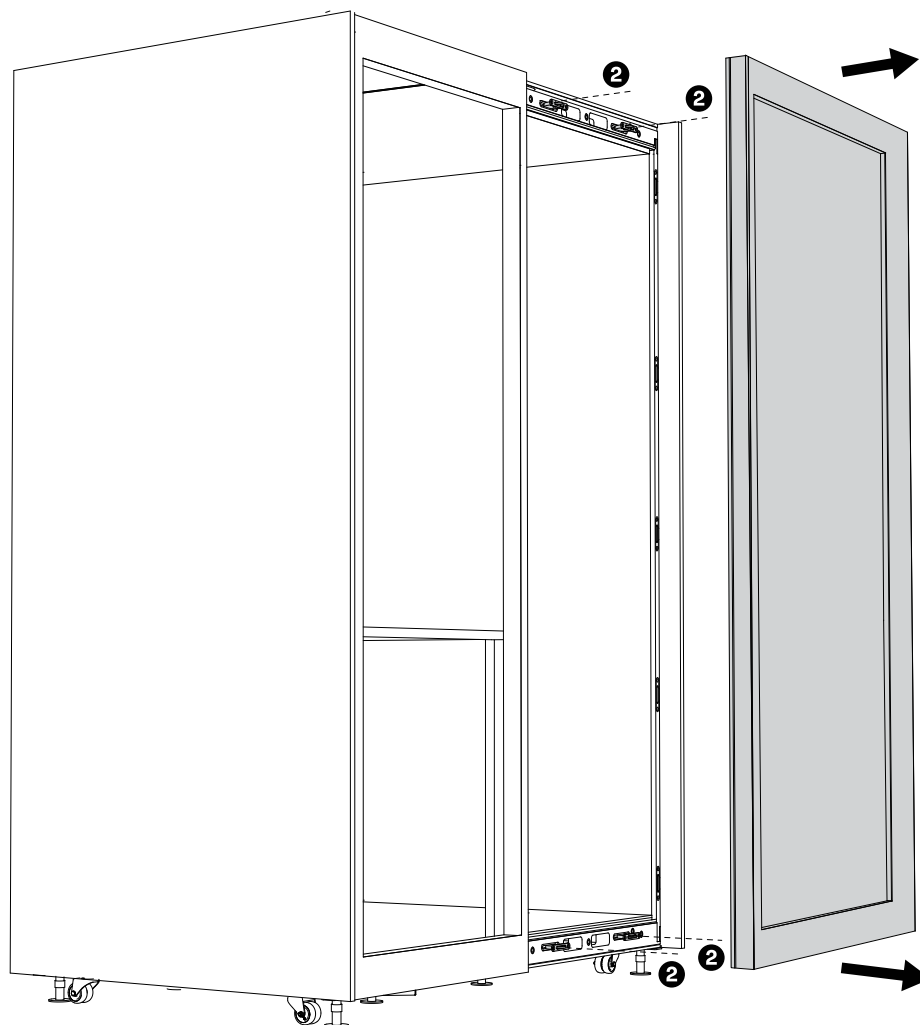

FAN		100%	80%	60%

2	<input type="checkbox"/> ON <input type="checkbox"/> OFF	<input type="checkbox"/> OFF	ON <input type="checkbox"/>	ON <input type="checkbox"/>

5.1

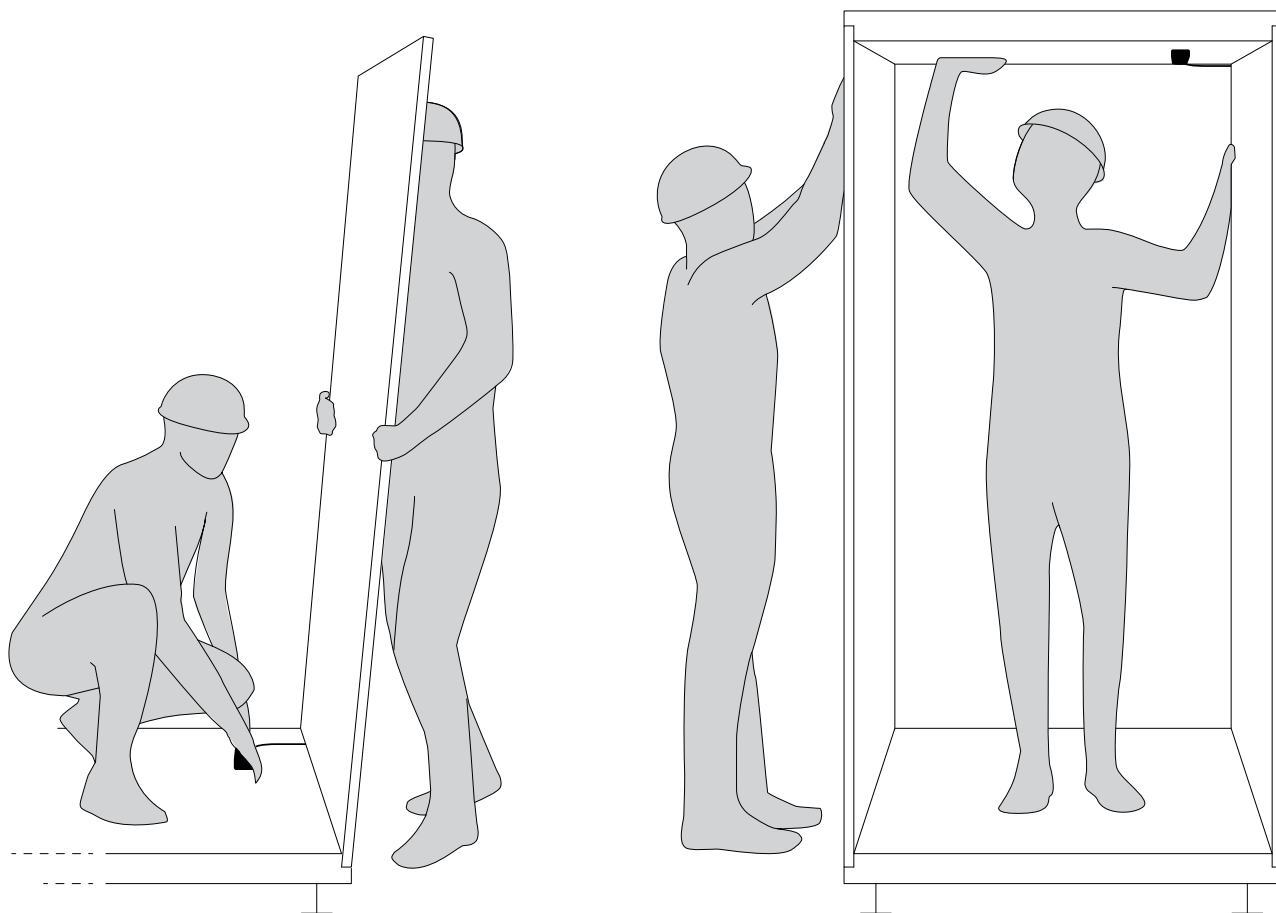

5.2

To finish assembly go back to step 6

Scan

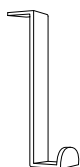

You can watch an instructional video of the K2 assembly process. Thanks to the modular design and limited number of components used for each pod, many steps are similar between different Kameleon pods.

Optional

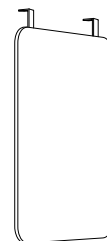

VESA Adapter

Coat Hanger

Exterior Hanging
Whiteboard or Pinboard

Interior Hanging
Whiteboard or Pinboard

There are multiple features that you can personalize your pod with. You can view them for each Kameleon on our website www.askiafurniture.ro
