ASKIA member of ARCADEGROUP

01

Perfectly complemented by the impressive technical expertise and high production capabilities of **ARCADEGROUP**, our new partnership brings forward a bigger potential for developing and manufacturing state-of-the-art objects. With the help of their over 140 specialists working in Bucharest and Mizil, combining creative craftsmanship with advanced technologies, ARCADE sustains the production of the existing and future **ASKIA** collections.

In Romanian, “AȘCHIA” means “the chip of wood”. For us, ever since the beginning, wood was the most meaningful material. We aim to express its vital power, undeniable qualities and symbolic meanings in everything we do. As a local saying wisely states, “the chip does not jump far from the trunk”. Our name, ASKIA (AȘCHIA), thus reflects a new beginning of something cherished that has been here before. A fresh start, but with invaluable lessons already encapsulated in our DNA. A change in strength and motivation. A bigger space for growth. With this belief in mind, we create sharp designs for timeless spaces.

Office Space, Bucharest, 2019.
Custom furniture and settings **produced by ARCADEGROUP**

Light Tale by 201 Design Studio

ASKIA carries forward, under a fresh approach, the legacy and commitment to quality design of one of the best Romanian design brands. In a new partnership with **ARCADEGROUP**, a top Romanian company providing complete services for tailor-made office spaces and high performance acoustic solutions, we kept the best of our previous experience: 5 years of solid growth, a consistent international presence, 86 products developed and countless of them sold all over the world. But together with ARCADEGROUP, we aim even higher. Now standing united as ASKIA, we focus our entire energy on developing a new product range of furniture and acoustic solutions dedicated to office spaces, under the creative direction of Dragoș Motica.

Marco Stool by Dragoș Motica

03 Idea

“Kameleon is the first product which bears the design signature of ARS (ASKIA Research Studio). A multidisciplinary design team under which ASKIA will develop its in-house products from now on.”

Dragoş Motica, Designer & Founder of ASKIA Furniture

Necessity is a changing matter. Only a Kameleon can keep up with it.

What you need is always different. From place to place, from one person to another. We embraced variability as a constant in our lives and asked ourselves: what stays the same? The need to move on, to get things going, to evolve fast. Kameleon is a range of acoustic booths that create a safe space for evolution. They foster visual and mental adaptability, increasing the focus, privacy and productivity of their users.

We meant to design the best consumer-friendly product on the market. Meaning that our design must have the following attributes: useful, versatile, flexible, safe, easy to transport, install and move, environmentally responsible, with a prompt delivery and a fair price. And because the product experience starts even before the purchase, we made sure the digital experience we provide with Kameleon is highly descriptive for our clients and easy in its complexity of detail. This is how Kameleon was born.

We hope you get to experience the qualities that Kameleon stands for and let us know if we succeeded in our mission!

USEFUL

Leverage the value of work and conversations in open spaces. Kameleon is made with the best sound insulation materials and technologies. The acoustic laminated glass and the interior panels made from recycled PET panels helped us obtain a high level of acoustic performance. Kameleon acoustic booths substantially reduce speech level inside, compared to the outside.*

SAFE

Choose a safe and healthy isle in a building's micro world. Our booths come with silent and very efficient ventilation and filtration systems. For extra safety, we fitted in the ventilation system an active, ozone free, air ionizer device which reduces the risk of infection. The air inside the booth is totally replaced, filtered and ionized every 68 to 100 seconds (depending on the pod size).

ENVIRONMENTALLY RESPONSIBLE

If chameleons are tree-huggers, Kameleon could only be just as friendly to the outside world. Almost all parts of Kameleon booths are recyclable. The interior panels of the booths are made from recycled PET felt, a soft, yet sturdy material. Durable in nature, PET felt offers great acoustic performance and can be recycled at the end of its life. The structure for the pods is made from wood and chipboard panels and the glass frames are made from aluminium and steel. Due to the fact that they are shipped flat-pack, Kameleon booths also have a low carbon footprint.

FLEXIBLE

Variation is key to evolution. With Kameleon, you are free to virtually explore countless assembly possibilities. Thanks to the modular system, Kameleon K2, K4, K6, K7 acoustic booths can be configured according to your needs and effortlessly upgraded in time. You can use our online configurator and obtain more than 10 000 pod variations. Because the “skin” of the Kameleon booth can be changed very easily, you can always redesign your acoustic booth by ordering from us only the cover panels. Thanks to the modular design, you can easily switch from a 2 person booth to a 4 person or 6 person booth and vice-versa.

PROMPT DELIVERY

Kameleon booths arrive quickly. The modular design and limited number of components used for each pod result in a fast production time. This enables us to stock semi-fabricated parts, cutting our production time significantly and helping us deliver Kameleon in almost no time, considering its complex functionalities. We promise a delivery time starting from 10 days depending on your configuration.

CHAMELEONIC

Fuse seamlessly just about anywhere, then change your Kameleon in an instant, based on necessities. The “chameleonic capability” is obtained due to our patented system of changing the exterior and interior panels, very quick and without tools. This allows us to obtain different visual looks on the same structural frame - from a sober, minimalistic look to a more joyfull or colorful look.

FAIR PRICE

Nothing costs you more than a moment of pointless distraction. Designed to improve productivity and well being in modern spaces, Kameleon follows an efficiency-first approach when it comes to production as well. Thanks to our modular thinking, we were able to optimize the production cost and create fairly priced products.

EASY TO INSTALL

Kameleon means time well spent for everyone, not only after the set up, but also before. You only need two people and four Allen Keys provided by us in the assembly kit. Less than 40 minutes and Kameleon K1 is ready to use!

EASY TO MOVE

Change of scenery? Just get ready, Kameleon is designed for them. The booths come equipped with wheels and leveling feet, so whenever you want to move your pod, you can do it very easily.

EASY TO TRANSPORT

We created Kameleon thinking about you and... common elevators. All Kameleon booths are shipped disassembled, making them very easy to be carried in elevators. K1, K2, K4, K6 fit in a 8 person elevator with interior dimensions of 1100 x 1400 x 2200mm (W x D x H) and an opening door dimension of 800 x 2000mm.

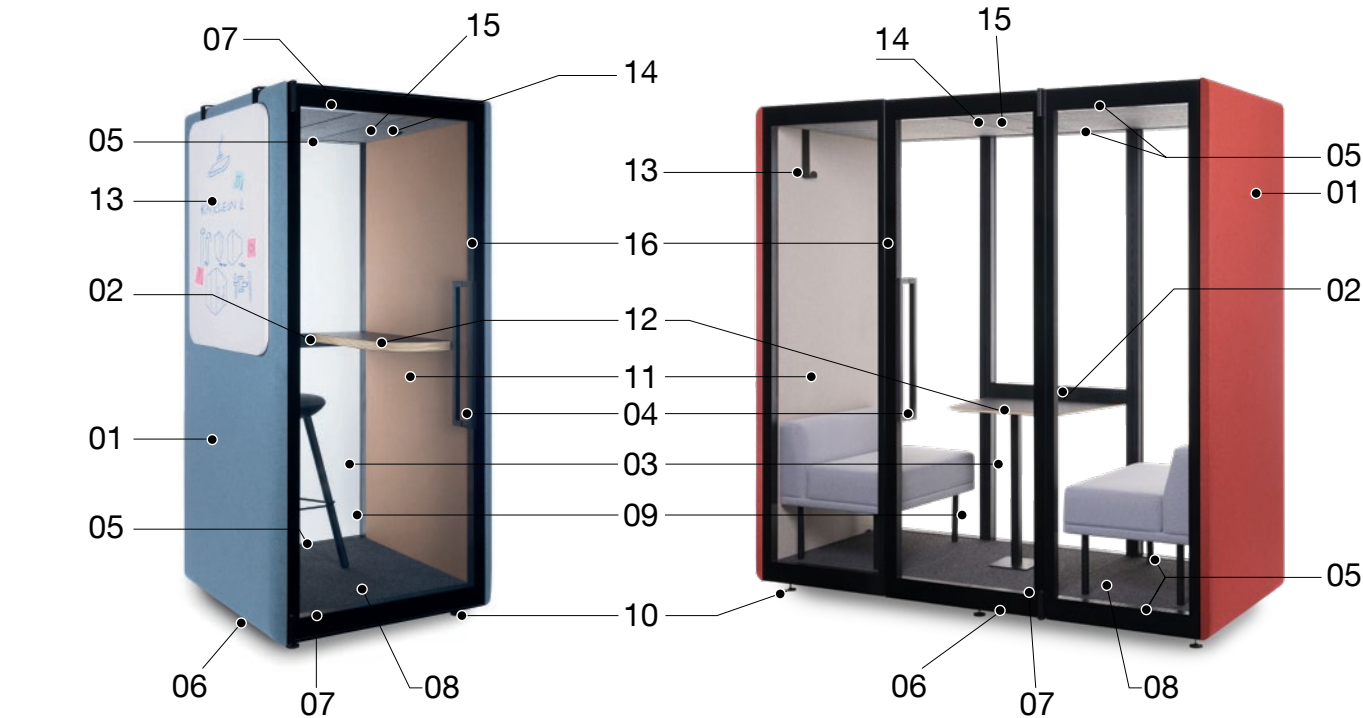

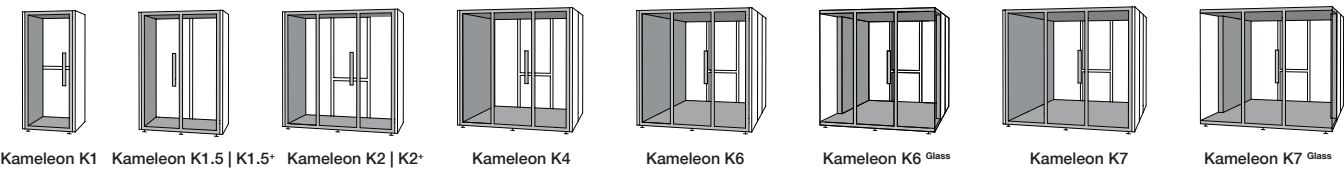

ONLINE CONFIGURATOR & AR

We made sure you can create the Kameleon you need. Our online configurator helps you personalize your pod according to your needs. With more than 10 000 options available, you can customize your acoustic booth to fit perfectly in your space. At the end of the process, you will know exactly the cost of it.

04

Customize

Kameleon Models

01 Exchangeable exterior panel

You can choose new panels from a variety of shapes, finishes and colours which are available to view in our online configurator.

02 Connectivity

1 x Power outlet
1 x USB Type A
1 x USB Type C
1 x CAT6 Ethernet socket

03 Solid back pannel

You can opt in for a Solid Back panel instead of the Acoustic Laminated Glass.

04 Left / Right Reversible opening door

When you install the frame, you can choose the door opening direction just by rotating it.

05 Airflow inlet & outlet

Our ventilation system is performant through its high efficiency and very silent fans.

06 Power and ethernet outlets

The power supply and ethernet outlet can be easily connected at the bottom. Each booth comes equipped with a 5m power cord.

07 Ionized and Purified air

The air pushed into the cabin is first filtered and then sanitized with an air ionizer.

08 Tufted polyamide carpet

The soft carpet has a high level of comfort and noise insulation impact.

09 Acoustic Laminated Glass

12mm thick acoustic laminated glass ensures high soundproof performance.

10 Levelers + Wheels

All Kameleon booths come equipped with wheels and leveling feet. Whenever you want to move your booth, you can do it very easily.

11 Interchangeable interior panel

You can choose from a variety of finishes and colours through our online configurator. If you want other finishes, the panels can be easily changed.

12 Table tops

All table tops are made from pine plywood and laminated with antimicrobial HPL.

13 Add-on accessories

Our accessories ease your work, and can be ordered separately or all together.

14 LED light

The overhead warm LED lighting ensures enough light for common activities.

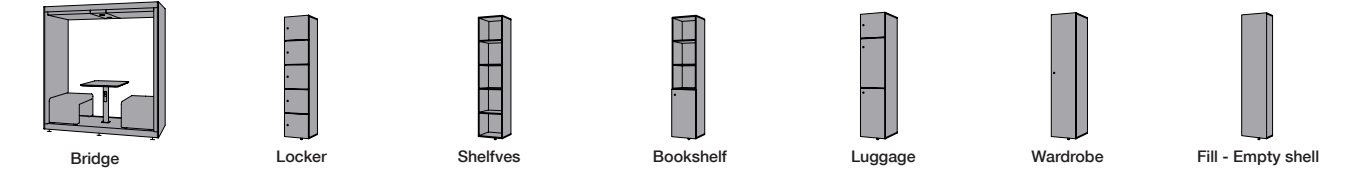

15 Motion sensor

The motion sensor activates the light and fans. After you leave the cabin, the ventilation stays on for 15 more minutes, making sure that all the air inside is fresh.

16 Magnetic Lock System

The magnetic lock system makes the daily usage more comfortable. The rubber gaskets help seal the door thus minimizing the noise coming from outside.

Link system Models

01 Kameleon Link System

By connecting the pods with various storage elements available in the LINK system, we enable a more harmonious and efficient layout of the workspace. The entire structure thus begins to work as a single, unified piece of furniture with visual coherence.

02 Storage

To make the most of the available space, we have developed two storage access types: side access for all types of Kameleon cabins, and front access for K1, K1.5, K1.5+, K2, and K2+ cabins.

03 Security is a priority

The storage modules can be secured with different types of locks, from Keypad or RFID Digital locks to mechanical locks. Plain, simple doors without any locking mechanism are also available.

04 Link Bridge

As the name says it, The Bridge from the Kameleon Link system acts like a connection bridge between two Kameleon cabins. It is an open two-person booth with sound-absorbing walls and ceiling for quiet chats and small meetings.

05 Casters Cover

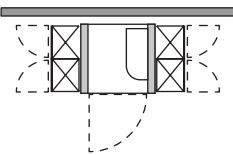

When a cleaner look is required, simply snap the cover to conceal the foot posts and finish the look of your desired Kameleon.

06 Height adjustable desk

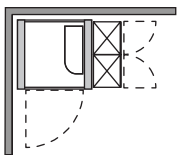

This desk is available for the K1.5 and K1.5+ versions, to ensure better posture and allow work while standing.

In order to help you understand which type of acces you should choose for your acoustic pods, we provide you several placement alternatives for our front and side acces storage spaces. These examples allow you to maximize the use of space, improving its optimization possibilities

Swan Offices, Nieuwkuijk

K1

K1 is ideal for important calls or video conferences in private. Have your discussions in private without disturbing your colleagues. Standardly equipped with a table top, this acoustic booth is perfect for individual work and phone calls.

Lookbook: “ Have more green! ”

K1 follows biophilic design principles and helps nature regain a central role in the modern workspace. “Biophilia” is a term derived from Greek and it translates as “love of life”. It expresses an archetypal longing of being close to nature and finding comfort in it, a feeling that we’ve lost more and more along with urban development. Using carefully selected natural materials like wood, natural textile fibers and moss, K1 creates the effect of an instant exotic getaway and offers to users the things they miss the most from their holidays: the greenery, the calmness, and the time to connect with nature.

Exterior panels : Moss - V01 Spring Green

Interior panels : Acoustic Felt + Fabric - Snergy E02

Seating option : TRIBUT Bar stool - Black

TRIBUT Bar stool
+ cushion

K1.5

K1.5 is ideal for longer desk related tasks.

Take your time, concentrate, and finish your tasks in silence using our private desk pod. Equipped with a small fixed or an adjustable height desk, the acoustic booth is perfect for fulfilling intense desk activities that demand deep focus.

Lookbook : “ Left or right, left or right, left or....? ”

Small, but very efficient, it helps you concentrate and finish your work in time.

Exterior panels : Plywood - Pine Z01

Interior panels : Acoustic Felt + Fabric - Lanee Melange C09

Adjustable desk

K1.5+

K1.5+ offers a wider desk than K1.5.

Take your time, concentrate, and finish your tasks in silence using our private desk pod. Equipped with a wider desk, the acoustic booth is perfect for fulfilling intense desk activities that demand deep focus.

Lookbook : “Quieter and bigger desk room!”

A bigger desk with more leg space means that you will feel like this desk was specially crafted for you. More comfort means more productivity.

Exterior panels : Round horizontal -Lanee Melange C07

Interior panels : Acoustic Felt + Fabric - Lanee Melange C08

Seating option : ACCENTO Office chair

Extra Features : Interior Hanging Pinboard

Interior Hanging
Pinboard

K2

K2 is perfect for small meetings or important private conversations without disturbing others in the office and vice versa.

Lookbook: “ Simple, elegant, minimalist.”

Straight corners and natural veneer create an elegant look, suitable for any interior design.

Exterior panel : Chipboard + Veneer - Y01 Oak

Interior panel : Acoustic Felt + Fabric - Lanee Melange C10

Seating option : TRIBUT Bar stool - Black

Table option : T03

Extra Features : Coat hanger

TRIBUT Bar stool

T03 Table

K2+ is the bigger brother of the K2 booth. It can accommodate slightly bigger meetings than K2 due to the fact that it is 20cm deeper.

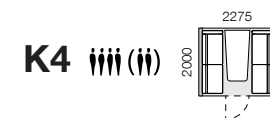

Lookbook: “ Noise catcher ”

As a standard, interior walls are covered with 12mm sound absorbing PET felt panels. You can choose to have the same type of acoustic material on the exterior panels. This will transform the booth into a veritable “noise catcher” on the exterior, as well.

Exterior panel : Top Panel : Acoustic Felt + Fabric - One A24
Bottom Panel : Acoustic Felt + Fabric - Salo A27
Interior panel : Acoustic Felt + Fabric - Synergy E07
Seating option : SO21 covered with Jet A23
Table option : TO1

SO21 Sofa

K4 can accommodate up to 6 people, if necessary, but it is the perfect option for 4 people.

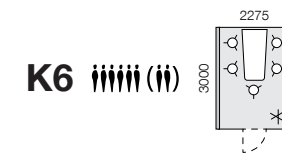

Lookbook: “ Serious discussions! ”

By using a Whiteboard and a cork Pinboard as exterior panels, the booth becomes an integrated part of the office space and activities. You can have small meetings around it, you can draw and write or pin important notes.

Exterior panel : Top Panel : Whiteboard W02
Bottom Panel : Plywood Z01
Interior panel : Acoustic Felt + Fabric - Lanee Melange C05
Seating option : SO52 covered with Jet A21
Table option : TO5
Extra Features : VESA Adapter

VESA Adapter

K6 was designed to comfortably accommodate at least 6 people.

Lookbook : “ Let's not be so serious! ”

It is designed as an informal space where the idea of meeting is imagined with a more relaxed approach in mind.

Exterior panel : Chipboard + Veneer - Y03 Ash
Interior panel : Acoustic Felt + Fabric - Synergy E10
Seating option : TRIBUT Bar stool - Black
Extra Features : KODAMA Coat rack
Table option : TO6

KODAMA Coat rack

Deriving from a K7 standard acoustic booth, which is the most spacious acoustic booth from our Kameleon Collection, K7 Meeting is our proposal for a ready to use meeting space setup. A space equipped with all that is necessary: a comfortable office chair, a spacious table, a highly efficient ventilation system and multimedia kit. As accessories, you can add a Whiteboard or a cork Pinboard and coat hanger.

Lookbook : “ Positive emotion ”

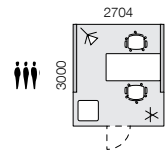

As many studies in psychology and visual arts have shown, whether in nature or interior spaces, the shapes we see subtly affect our mood in different ways. While sharp edges can trigger emotional responses such as anxiety and fear, curved contours are proved to have the opposite effect: they convey a state of wellbeing, calm and happiness. K7 stands out through its rounded exterior panels, covered in a layer of foam and textile. These features contribute to an enjoyable and friendly appearance.

Exterior Panel : Round Corners - Lanee Melange C07
Interior Panel : Acoustic Felt - Dark grey
Seating Option : ACCENTO Office chair
Table Option : VORK S (integrated socket)
Extra Features : VESA Adapter

VORK S Table

K7 Glass Office

K7 Glass is a more open option of a K7, with extended glass surfaces. Due to the modular design of the Kameleon Collectio, you can always switch from solid panels to glazed ones without any constraints.

Lookbook : “ Let’s talk in private! ”

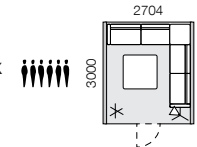

In this image we are presenting the K7 Glass Office in a “ready to use” setup. This type of acoustic booth can serve as a more quiet discussion space in shopping and retail spaces, where private spaces are more difficult to configure.

- Exterior panel : Chipboard + Melamine - X04
- Interior panel : Acoustic Felt - Dark grey
- Seating option : ACCENTO Office chair
- Table option : VORK Desk
- Extra Features : THE CATCHER 60 Coffee table
KODAMA Coat rack
LIGHT TALE Lamp

THE CATCHER 60 Coffee table

K7 Mix

If you want a space where your team can enjoy different activities, we have set up the K7 Mix.

Lookbook : “ Relax now, solve your problems later! ”

K7 Mix is our vision on how a relaxing space should look.

A space which can accomodate 4 to 8 people, depending on the configuration. It comes equipped with sofas and coffee tables. Additionally, you can add a Whiteboard, a cork Pinboard and a multimedia kit.

- Exterior panel : Chipboard + Veneer - Y02 Walnut
- Interior panel : Acoustic Felt - Dark grey
- Seating option : SO51 and SO52 covered with Jet A23
- Extra Features : THE CATCHER 60 Coffe table
THE CATCHER 80 Coffe table
KODAMA Coat rack
LIGHT TALE Lamp
ADJACENT Side table

ADJACENT Side table

THE CATCHER 80 Coffee table

Solid Back Panel

Solid Back Panel.

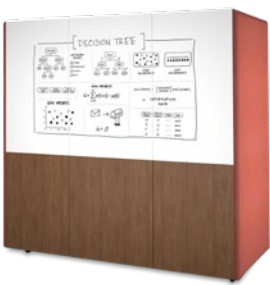

You can now opt for a Solid Back Panel for any of the Kameleon pods. This version can be placed closer to a wall, offering a better integration and positioning where the space does not allow a central placement for the pod.

The standard back walls are covered on the vinside with 12mm sound-absorbing PET felt panels.

Lookbook: “ Space Saver ”

- Pod type : K2
- Exterior panel : Round Corners - Lanee Melange C07
- Interior panel : Acoustic Felt + Fabric - Lanee Melange C10
- Seating option : Tribute Chair covered with Lanee Melange C10
- Table option : TO3

Back panel:
Top Panel : Whiteboard W02
Bottom Panel : Walnut 10.16

Link Bridge

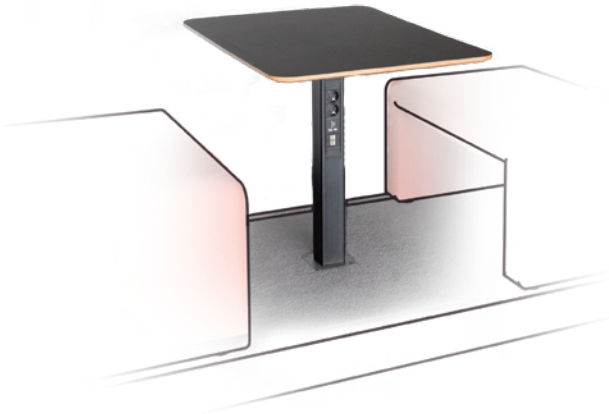

Link Bridge

As the name says it, The Bridge, part of the Kameleon Link system, acts like a connection bridge between two Kameleon cabins. It is an open two-person booth with sound-absorbing walls and ceiling for quiet chats and small meetings.

The table is equipped with 2 x Power outlets (EU, UK, AUS, USA, FR), 1 USB Type A, 1 x USB Type C, and 2 x CAT6 Ethernet sockets.

Lookbook: “Connected and aligned”

- Link pods: K1.5, Bridge, K1
- Interior panel: Jet - A19

Link

Link

By connecting the pods with diverse storage modules available in the LINK system, AŞKIA offers the possibility for clients and architects to insert Kameleon acoustic pods in a much more harmonious and efficient way within a workspace and treat the entire construction more like a piece of furniture.

Lookbook: “Array of useful space.”

Pod type : K1.5, K1
Storage type : Wardrobe. Locker
Exterior panel : VM133
Interior panels : Lane Melange C08, C12
Seating option : ACCENTO Office chair, Tribut bar stool

TRIBUT Bar stool
+ cushion

Storage

Storage

You can configure or reconfigure your Kameleon with a multitude of storage modules: lockers of different sizes, wardrobes or simple shelves.

Lookbook: “A place for everything you need.”

Pod type : K1.5
Storage type : Wardrobe. Locker
Exterior panel : Moss - V01 Spring Green
Interior panel : Lane Melange C09

Chit chat

Chit chat

Chit chat is manufactured from sound absorbing materials and with a laminated table top inside. Part of the Acoustic collection, and it can be mounted either on the Kameleon acoustic pods or standing independent on the wall.

Lookbook: “Let’s have a phone call”

Pod type : K1
Exterior panel : Pegboard + Plywood Z01.
Interior panel : Acoustic Felt - Dark grey
Chit-Chat : Lanee melange C12

Details

Floor/Ceiling

The colour of the carpet always comes in Melange grey.

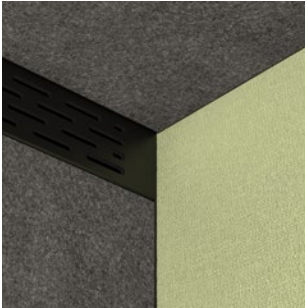

The ceiling is always covered in Dark grey Acoustic PET Felt panels made from 100% recycled polyester fiber.

Back Panel

The exterior solid back panel is available in all 18 mm finishes: Acoustic Felt, Chipboard, Plywood, Whiteboard and Pinboard.

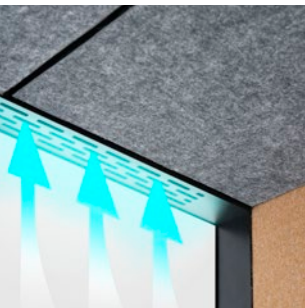

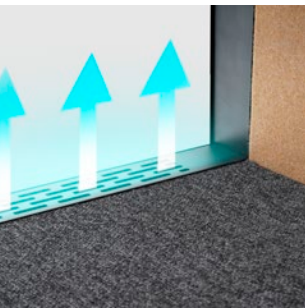

The interior panel of the solid back is available only in the Dark grey Acoustic PET Felt.

Ventilation

Ventilation grilles are placed at the ground and ceiling level. The one from the ground level pushes fresh filtered air, while the one from the ceiling level removes stale air. The motion sensor activates the light and fans. After you leave the cabin, the ventilation keeps working for 15 more minutes, ensuring that all the air inside is fresh. The fans come adjusted at 75%, but they can be set to 60% and 100% as well. The air inside the booth is totally replaced, filtered and ionised every 68 to 100 seconds (depending on the pod size).

Air Ionizer

All Kameleon come standard equipped with **Air Ionizer**.

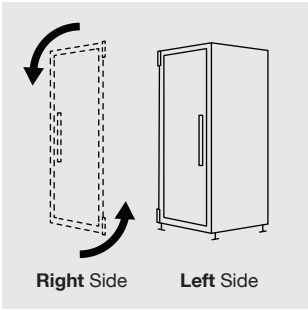

To improve the quality of the air inside the booth and implicitly ensure better health for its users in the long term, all Kameleons come standardly equipped with Air Ionizer, mounted on the ventilation system. Ionizers are particularly important for the quality of the air, as they neutralise odours and have a beneficial effect on the environment. Even if they are invisible particles, the negative ions have a very pleasant, refreshing effect, comparable to the experience of the air after a summer rain or the air in a fascinating country side area, untouched by the modern pollution.

Door handle / Orientation

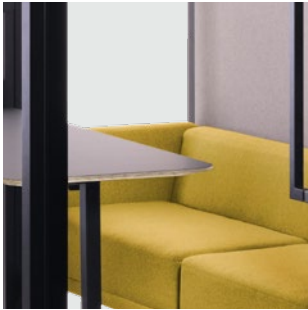

The door handle is made from painted stainless steel. All glass panels are mounted on aluminium frames. All metal parts are powder coated with a special antimicrobial coating.

Colour option:
Satin Black
Satin White

The door opening direction for all Kameleon booths can be switched just by rotating the frame during installation.

Tables

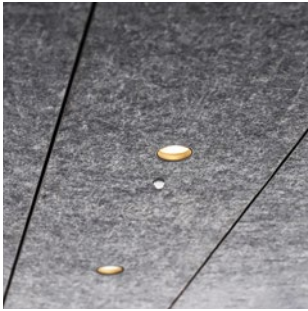

All tables are made from pine plywood and laminated with antimicrobial HPL in White or Black satin finish.

Lighting

The overhead LED Light ensures enough light for common activities in a K1 phone booth.

Integrated LED Spot Light
Energy consumption: 3.8W
Input: 12V
Lumen output: 350 lumen
Color Temperature: 3000K
Color Rendering Index: 83

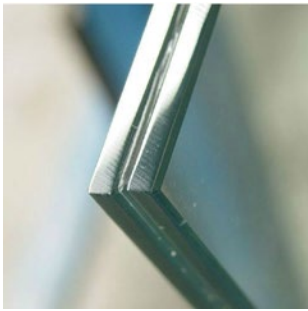

K1.5, K1.5+, K2, K2+ have 2x LED Lights each.

Integrated LED Spot Light
Number of spots: 2
Energy consumption: 7.6W
Input: 12V
Lumen output: 700 lumen
Color Temperature: 3000K
Color Rendering Index: 83

Power Connections / Glass Panel

The power supply and ethernet connection can be easily fixed at the floor level. Each booth comes standardly equipped with a 3m power cord.

12mm thick acoustic laminated glass with acoustic foil ensures high soundproof performances. The acoustic interlayer also helps retain broken glass fragments if broken, reducing the risk of injuries.

Socket

For K1:
1x Power outlet
1 x USB Type A
1 x USB Type C
1x CAT6 Ethernet socket

For K1.5, K1.5+,K2, K2+, K4, K6:
2 x Power outlet
1 x USB Type A
1 x USB Type C
2 x CAT6 Ethernet socket

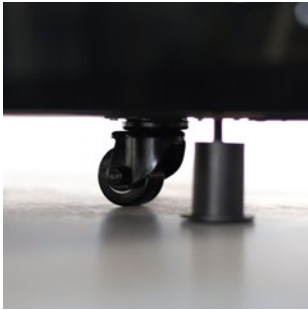

For K7:
6x Power outlet
1x USB Type A
1x USB Type C
2 x CAT6 Ethernet socket

Available for all booths:
EU UK AUS US
FR/BE CH

Casters cover / Casters

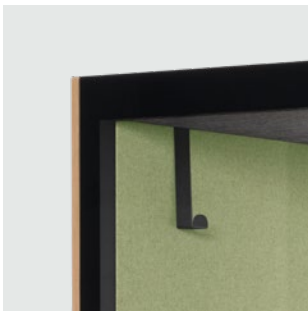

In some cases, a cleaner look is required. With this in mind we listened to customer feedback and developed a solution which covers the feet and casters, while still providing enough room for cables and airflow. Simply snap the cover to the footposts and finish your desired Kameleon pod look.

Kameleon booths come equipped with wheels and floor adjusters, so whenever you want to move your pod, you can do it very easily. The integrated floor levelers can be adjusted and they help leveling the booth on different surfaces. All booths have to rest on levelers, the wheels are only for moving purpose.

Accessories

Door damper / Sprinkler

The door damper is an optional feature which adds an extra level of sophistication. This feature allows the door to close by itself, achieving a soft close effect.

Every booth from the Kameleon Collection can be outfitted with a standard sprinkler for fire safety. The pods can be made to order or retrofitted to accept standard issue sprinklers.
